Important Safety Precautions

Important Safety Instructions

The following definition applies to the word “Warning” found throughout this manual:

⚠️ WARNING Used to call attention to POTENTIAL hazards that could result in personal injury or loss of life.

READ ALL INSTRUCTIONS BEFORE ASSEMBLING THE MACHINE.

⚠️ WARNING For your safety, perform all assembly steps in the sequence given. Improper assembly can lead to injury.

⚠️ WARNING Some components can be heavy or awkward to handle. Get help if necessary.
Before You Begin

Before You Assemble

Please take the time to read all assembly instructions before attempting to assemble your Bowflex Xceed™ Plus home gym. Select where you are going to locate your machine carefully. The best place for your Bowflex Xceed™ Plus home gym is on a hard, level surface.

Select a workout area that provides a minimum clearance behind the rod box of 0.5 ft (15 cm) and a total width of 6.5 ft (2.0 m). Allow a minimum of 3.0 ft (0.9 m) free space in front of the machine.

Basic Assembly Principles

Here are a few basic tips that will make your assembly of the Bowflex Xceed™ Plus home gym quick and easy. By using these principles, you can simplify each process and save yourself extra time and effort.

1. To make the assembly process go faster, gather the pieces you need for each step and thoroughly read the assembly instructions for that step prior to starting assembly for the step.

2. When tightening a locknut on a bolt, use a combination wrench to grip the locknut and ensure that it is fastened securely.

3. When attaching two pieces, gently lift and look through the bolt holes to help guide the bolt through the holes.

4. As a general rule, and for all bolts and nuts on your Bowflex Xceed™ Plus home gym, turn bolts or nuts toward the right to tighten and left to loosen. Or you can remember the mnemonic: “Righty tighty, lefty loosey.”

IMPORTANT: LEAVE ALL CABLES COILED AND WRAPPED UNTIL YOUR BOWFLEX XCEED™ PLUS HOME GYM IS FULLY ASSEMBLED.
