**ORIGINAL MANUAL - ENGLISH VERSION ONLY**

Assembly / Owner’s Manual
Important Safety Instructions

When using an electrical appliance, basic precautions should always be followed, including the following:

⚠️ This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury.

Obey the following warnings:

Read and understand all warnings on this machine.

Carefully read and understand the Assembly instructions.

⚠️ DANGER

Carefully read and understand the Assembly instructions. Read and understand the complete Manual. Keep the Manual for future reference.

⚠️ WARNING

To decrease the risk of burns, electric shock, or injury to persons, read and understand the complete Owner's Manual. Failure to follow these guidelines can cause a serious or possibly fatal electrical shock or other serious injury.

- Keep bystanders and children away from the product you are assembling at all times.
- Do not connect power supply to the machine until instructed to do so.
- To reduce the risk of electrical shock or unattended/unsupervised usage, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.
- Before each use, examine the machine for damage to power cord, loose parts or signs of wear. Do not use if found in this condition. If purchased in US/Canada, contact Customer Service for repair information. If purchased outside US/Canada, contact your local distributor for repair information.
- Not intended for use by persons with medical conditions where those conditions may impact the safe operation of the machine or pose a risk of injury to the user.
- Do not drop or put objects into any opening of the machine.
- Never operate this machine with the air openings blocked. Keep the air openings free of lint, hair and the like.
- Do not assemble this machine outdoors or in a wet or moist location.
- Make sure assembly is done in an appropriate work space away from foot traffic and exposure to bystanders.
- Some components of the machine can be heavy or awkward. Use a second person when doing the assembly steps involving these parts. Do not do steps that involve heavy lifting or awkward movements on your own.
- Set up this machine on a solid, level, horizontal surface.
- Do not try to change the design or functionality of this machine. This could compromise the safety of this machine and will void the warranty.
- If replacement parts are necessary, use only genuine Nautilus replacement parts and hardware. Failure to use genuine replacement parts can cause a risk to users, keep the machine from operating correctly and void the warranty.
- Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Manual.
- Read and understand the complete Manual supplied with this machine before first use. Keep the Manual for future reference.
- Do all assembly steps in the sequence given. Incorrect assembly can lead to injury or incorrect function.
- SAVE THESE INSTRUCTIONS.
Before using this equipment, obey the following warnings:

Read and understand all warnings on this machine. If at any time the Warning labels become loose, unreadable or dislodged, replace the labels. If purchased in US/Canada, contact Customer Service for replacement labels. If purchased outside US/Canada, contact your local distributor for them.

- Children must not be let on or near to this machine. Moving parts and other features of the machine can be dangerous to children.
- Not intended for use by anyone under 14 years of age.
- Consult a physician before you start an exercise program or a new health and diet plan. Stop exercising if you feel pain or tightness in your chest, become short of breath, or feel faint. Contact your doctor before you use the machine again. Use the values calculated or measured by the machine's computer for reference purposes only. The heart rate displayed on the console is an approximation and should be used for reference only.
- Before each use, examine this machine for loose parts or signs of wear. Do not use if found in this condition. Monitor the Pedals and Crank Arms closely. If purchased in US/Canada, contact Customer Service for repair information. If purchased outside US/Canada, contact your local distributor for repair information.
- Maximum user weight limit: 136 kg (300 lbs.). Do not use if you are over this weight.
- This machine is for home use only. Do not place or use the machine in a commercial or institutional setting. This includes gyms, corporations, work places, clubs, fitness centers and any public or private entity that has a machine for use by its members, customers, employees or affiliates.
- Do not wear loose clothing or jewelry. This machine contains moving parts. Do not put fingers or other objects into moving parts of the exercise equipment.
- Set up and operate this machine on a solid, level, horizontal surface.
- Make the Pedals stable before you step on them. Use caution when you step on and off the machine.
- Do not operate this machine outdoors or in moist or wet locations.
- Keep at least 0.6 m (24") on each side of the machine clear. This is the recommended safe distance for access and passage around and emergency dismounts from the machine. Keep third parties out of this space when machine is in use.
- Do not over exert yourself during exercise. Operate the machine in the manner described in this manual.
- Perform all regular and periodic maintenance procedures recommended in the Owner’s Manual.
- Keep the Pedals and Handlebars clean and dry.
- Exercise on this machine requires coordination and balance. Be sure to anticipate that changes in speed and resistance level can occur during workouts, and be attentive in order to avoid loss of balance and possible injury.
- This machine cannot stop the Pedals or Upper Handlebars independently of the Resistance Fan. Reduce the pace to slow the Resistance Fan, Upper Handlebars and Pedals to a stop. Do not dismount the machine until the Pedals and Upper Handlebars have come to a complete stop.
- Do not drop or put objects into any opening of the machine.
- Prior to use read and understand the Owner’s Manual. The appliance is not to be used by persons with functional limitations and impairments, reduced physical, sensory or mental capabilities, or lack of experience and knowledge.
- This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Keep children under the age of 14 away from this machine.
- Children should be supervised to ensure that they do not play with the appliance.
FCC Compliance

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

The machine and power supply comply with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This machine and power supply have been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
Before Assembly

Select the area where you are going to set up and operate your machine. For safe operation, the location must be on a hard, level surface. Allow a workout area of a minimum 199.4cm (78.5”) x 246.9cm (97.2”). Be sure that the workout space you are utilizing has adequate height clearance, taking into consideration the height of the user and the maximum pedal height of the fitness machine.

Basic Assembly Tips

Follow these basic points when you assemble your machine:

• Read and understand the “Important Safety Instructions” before assembly.
• Collect all the pieces necessary for each assembly step.
• Using the recommended wrenches, turn the bolts and nuts to the right (clockwise) to tighten, and the left (counterclockwise) to loosen, unless instructed otherwise.
• When attaching 2 pieces, lightly lift and look through the bolt holes to help insert the bolt through the holes.
• The assembly requires 2 people.

Machine Mat

The Bowflex™ Max Trainer™ Machine Mat is an optional accessory that helps keep your workout area clear and adds a layer of protection to your floor. The rubber machine mat provides a non-slip, rubber surface which limits static discharge and reduces the possibility of display errors. If possible, put your Bowflex™ Max Trainer™ Machine Mat in your selected workout area before you begin assembly.

To order the optional machine mat, contact Customer Service (if purchased in US/Canada) or your local distributor (if purchased outside US/Canada).
A decal has been applied to all right ("R") and left ("L") parts to assist with assembly.

**Note:** Select pieces of Hardware have been provided as spares on the Hardware Card. Be aware that there may be remaining Hardware after the proper assembly of your machine.

---

## Tools

### Included

- #2
- 4 mm
- 5 mm
- 6 mm
- 8 mm
- 13 mm
1. Attach Rail Assembly to Frame and then Release the Frame from the Shipping Plate

⚠️ Some components of the machine can be heavy or awkward. Use a second person when doing the assembly steps involving these parts. Do not do steps that involve heavy lifting or awkward movements on your own.

NOTICE: Hand tighten hardware.
2. Attach Levelers to the Stabilizer Assembly
3. Carefully Lift the Frame Assembly from the Shipping Plate and Attach to the Stabilizer Assembly

⚠️ Some components of the machine can be heavy or awkward. Use a second person when doing the assembly steps involving these parts. Do not do steps that involve heavy lifting or awkward movements on your own. Lift the Frame Assembly from the exterior of the pivot assembly as indicated below.

NOTICE: Once all hardware has been hand tightened, fully tighten ALL hardware from previous steps.
4. Attach Stabilizer Shrouds to the Frame Assembly
5. Attach Rear Shroud and Caps to the Frame Assembly

NOTICE: Place the inside hook of the Rear Shroud on the Frame Assembly and then pivot it up into place.
6. Attach Legs to Frame Assembly

⚠️ Be aware that the Legs are connected and when either of these parts move the other does as well.
7. Attach Pedals to Frame Assembly

⚠️ In order to avoid possible serious injury, when inserting the tube ends into the Leg Assemblies be careful to avoid fingers or hands being caught or pinched.
8. Attach the Foot Platforms and Foot Pads to the Pedals
9. Cut the Shipping Zip-Tie that Secures the Cables, Connect the Cables, and Attach the Static Handlebar Assembly and Tray Insert

**NOTICE:** Do not let the Cables drop into the Frame Assembly. Do not cut or crimp the Console Cables. Be sure to fully connect the cable connectors. Once all hardware has been hand tightened, fully tighten the hardware with the 5mm hex wrench.
10. Remove the Rear Console Cover and Hardware from the Console Assembly. Connect the Cables and Place the Console onto the Static Handlebar. With the Excess of the Cables Pushed into the Static Handlebar, Pivot the Console Assembly Downward and Secure It to the Static Handlebars

**NOTICE:** Do not cut or crimp the Cables. Each Cable connector (3-pin, 4-pin, 5-pin and 12-pin) has a corresponding end connector with that many openings. Be sure to fully connect the cable connectors. *Hardware is not supplied on the Hardware Card.*
11. Attach the Upper Handlebars to Frame Assembly

⚠️ Be aware that the Pedals and the Upper Handlebars are connected and when either of these parts move the other does as well. Some components of the machine can be heavy or awkward. Use a second person when doing the assembly steps involving these parts. Do not do steps that involve heavy lifting or awkward movements on your own.

**NOTICE:** Be sure to attach the Upper Handlebars so that they are in the range of operation for the User. Be sure to fully tighten the hardware.
12. Connect the AC Adapter to the Frame Assembly

NOTICE: Be sure to use the appropriate AC Adapter plug for your region.
13. Set Up Your Machine
   a. With the machine plugged into a functioning wall outlet, the machine will start up and the red Status LED will activate.
      If the machine does not start up immediately, then the Console may need to charge. It will take about 60 minutes to charge the machine enough to activate it.
      
      **Note:** The Console may go to sleep if it does not receive any input after charging. Touch the screen of the Console to wake up the machine.

   b. When charged, the machine will activate and display the Welcome - Connect Wifi screen. Tap on Connect.
      
      **Note:** A Wifi connection is required to use your Bowflex™ Max Total™ machine. If you do not have a Wifi connection available, contact your Bowflex™ Max Trainer™ Representative or your local distributor immediately for further assistance.

   c. The Console will display the list of available Wifi connections. Tap on the desired Wifi connection, and enter the password. Tap on Connect.

   d. The Console will test and connect to the Wifi connection.
      
      If the Console displays an Update Available screen, tap on the Agree button. The Console will update the software.

   e. With a Wifi connection established, tap on Back.

   f. The Console will open the Bowflex™ JRNY™ App. Tap on Get Started.

   g. The Console will display the options screen. Click on the Log In option. Follow the prompts to register your new fitness machine. When registration is completed, your fitness machine is now ready for use.

   h. The Console will display the Home tab. The Home tab will encourage you to do your Fitness Assessment workout to get a custom workout*, or to do a Max 14 Interval workout.

14. Final Inspection
Inspect your machine to ensure that all hardware is tight and components are properly assembled.

   **Note:** Remove any protective covers from the face of the Console. Remove the plastic scratch guard strips from Rails.

   Be sure to record the serial number in the field provided at the front of this manual.

   **⚠️** Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.

---

* The custom workout, Bowflex™ radio, and voice coaching features and certain videos require a subscription to the premium features of the Bowflex™ JRNY™ app. The Bowflex™ JRNY™ subscription must be purchased separately by downloading the JRNY™ app onto your phone or tablet and subscribing within the downloaded app or (for United States customers only) directly from Nautilus, Inc. by calling 800-269-4216. This feature may not be available in all countries.
Adjustments

Moving the Machine

⚠️ The machine may be moved by one or more persons depending on their physical abilities and capacities. Make sure that you and others are all physically fit and able to move the machine safely.

1. Grasp the Main Bar of the Static Handlebar Assembly to carefully tilt the machine toward you onto the transport rollers. Be sure not to grab the Console Display.

⚠️ Be aware of the Handlebars and the weight of the machine before tilting the machine.

2. Push the machine into position.
3. Carefully lower the machine into position.

NOTICE: Be careful when you move the machine. All abrupt motions can affect the computer operation.

Leveling the Machine

The machine needs to be leveled if your workout area is uneven or if the Rail Assembly is slightly off the floor. To adjust:

1. Place the machine in your workout area.
2. Loosen the locking nuts and adjust the levelers until they are evenly balanced in contact with the floor.

⚠️ Do not adjust the levelers to such a height that they detach or unscrew from the machine. Injury to you or damage to the machine can occur.

3. Tighten the locking nuts.

⚠️ Make sure the machine is level and stable before you exercise.
Use the values calculated or measured by the machine’s computer for reference purposes only. The heart rate displayed is an approximation and should be used for reference only. Over exercising may result in serious injury or death. If you feel faint stop exercising immediately.
Console Features
The Bowflex™ Max Total™ machine uses the Bowflex™ JRNY™ App as the central component of the console. With Custom guided workouts, friendly virtual coaching, and workouts that adjust to you*, the Bowflex™ Max Total™ machine is totally focused on your journey to long-term fitness success.

* The custom workout, Bowflex™ radio, and voice coaching features and certain videos require a subscription to the premium features of the Bowflex™ JRNY™ app. The Bowflex™ JRNY™ subscription must be purchased separately by downloading the JRNY™ app onto your phone or tablet and subscribing within the downloaded app or (for United States customers only) directly from Nautilus, Inc. by calling 800-269-4216. This feature may not be available in all countries.

A Wifi connection is required to use your Bowflex™ Max Total™ machine. If you do not have a Wifi connection available, contact your Bowflex™ Max Trainer™ Representative immediately for further assistance.

Note: Your Console may not look exactly as the provided images. These images are to be used only as a guide to your machine.

Console Display
The Console Display shows everything to help with your fitness journey, from virtual coaching to trainer-led video workouts. It can even provide streaming shows** as you workout. And everything can be controlled with a simple touch of the Display. Just touch the Display to make a selection, start a workout, or to simply wake up the Console.

Status LED and Status LED Ring
The Status LED and Status LED Ring show if the Console is activated and starting up/operating correctly (LED is on), if the battery is being initially charged (LED turns off briefly every 2 seconds), or if the Console is experiencing an error (LED is blinking quickly). To reset the Console during an error, disconnect the power to the machine for 30 seconds and reconnect it.

Note: For the initial Start-up or after a long period of storage, the Console can take up to 3 minutes to activate and then may need to charge for an hour.

Resistance Level Knob
Turn the Knob to adjust the resistance level. Clockwise will increase the value, counter-clockwise will decrease the value.

Console Display from WORKOUTS tab (Benefit Mode Program selected)

JOURNAL tab
Displays the past Workouts, Totals, and Achievements for the selected User Profile.

** Streaming subscription not included.
WORKOUTS tab
Displays the workout programs available on the machine.

HOME tab
The start-up screen for the current User Profile.

CHANNEL tab
Displays the available media provided over a Wifi connection.

PROFILE tab
View and edit User Profile details.

FITNESS ASSESSMENT tab
Tap to select the Fitness Assessment program. The results from this workout will be used to create the custom workouts* for each profile user.

PROGRAMS tab
Tap to select a standard program.

Workout Profile display
The Workout Profile display area shows the course profile of the program. Each column in the profile shows one workout segment. The higher the column, the higher the intensity of the workout.

During a Target Coaching Program, the Workout Profile shows the target level of Burn Rate. During a Benefit Mode Program, the Workout Profile shows the level of resistance. The Console will adjust the Resistance Level during the workout.

Workout Profile
The Workout Profile shows the course profile of the workout program. The higher the segments of the workout program, the more intense the workout.

Goal display
The Goal display shows the total workout time or the total calories for a non-interval workout. During an Interval workout, the Goal display counts down the time until the end of the workout. This display will be blank during a Manual workout. When the goal is time based, the clock icon is displayed. Use the Subtraction (-) or Addition (+) buttons to modify the Goal display.

Time slider
The Time Slider modifies the total time of a Custom Workout by 1:00 minute increments. Slide it to the right to increase the time, and left to decrease. Based on your current fitness level, there may be restrictions for your maximum workout time.

EASIER or HARDER Resistance Level button
The EASIER or HARDER Resistance Level buttons modify the resistance levels for the entire Custom Workout.

* The custom workout, Bowflex™ radio, and voice coaching features and certain videos require a subscription to the premium features of the Bowflex™ JRNY™ app. The Bowflex™ JRNY™ subscription must be purchased separately by downloading the JRNY™ app onto your phone or tablet and subscribing within the downloaded app or (for United States customers only) directly from Nautilus, Inc. by calling 800-269-4216. This feature may not be available in all countries.
RECOMMENDED button
The RECOMMENDED button resets the Custom Workout to the settings that were provided based on your fitness level and current routine.

START button
Starts the selected Program workout, resumes a paused workout, or accepts a displayed value for an option.

STOP button
Ends a paused workout, or goes to the Home Tab.

Burn Rate display
The Burn Rate display shows the level of calories being burned per minute. This rate is a function of Intensity, which is the current level of RPM (pedal speed) and resistance level. As either of those values increase, the Burn Rate will increase.

Burn Rate Target range
The Burn Rate Target range is based on the selected User Profile. A range of Burn Rate segments are activated during an Interval workout. The first of the segments in the range is a suggested beginner level, with the higher segments being for a more advanced fitness user. The intensity of the range is based on the Workout Profile display.

Note: For a more exact calorie burn rate and suggested target range, be sure to complete a Fitness Assessment workout and keep the User Profile current.

The Target Range is a suggested workout level, and should only be followed if your physical fitness level allows.

During an Interval workout, the SPRINT range will be the red segments, and the RECOVER range will be the blue segments.

Maximum Burn Rate marker
The Maximum Burn Rate marker is an indicator that shows the highest rate of calorie burn achieved during the current workout.

SPRINT
The high Intensity segment of an Interval workout. During an Interval workout, the active segment shifts between the SPRINT and RECOVER segments with an audible confirmation, counting the time down for the currently active segment.

RECOVER
The reduced output workout segment of an Interval workout, counting down until the next SPRINT segment.

Benefit Zone display
A suggested Burn Rate Target Zone to gain the full benefits from the current workout; Fat Burn, Endurance, and Performance Zones.

Using the Bowflex™ JRNY™ App on your Portable Device   (Optional)
Though the Bowflex™ JRNY™ App keeps track of all your workouts, along with your total calories burned, time, and more on the machine, you can also access all of your information remotely on your own device. Simply download the App to your device and access your profile.

1. Download the free app, named “Bowflex™ JRNY™ App”. The app is available on Google Play™ and the App Store.
   Note: For a complete list of supported devices, review the app on the App Store or Google Play™.
2. Follow the instructions on the app to sync your device to your Bowflex™ JRNY™ account.
   When your device has access to the account, you will be able to review workouts, coaching tips*, and upcoming workouts.

USB Charging
If a USB Device is attached to the USB Port, the Port will attempt to charge the Device. The power supplied from the USB Port may not be enough to operate the Device and charge it at the same time.

Media Rack (Optional Accessory)
An optional accessory can be added to your fitness machine that will hold additional media above the Console. The optional Media Rack easily attaches to your machine, adding more space for media and devices.

To order the optional Media Rack, contact Customer Service (if in US/Canada) or your local distributor (if outside US/Canada).

Contact Heart Rate Sensors
Contact Heart Rate (CHR) sensors send your heart rate signals to the Console. The CHR sensors are the stainless steel parts of the Handlebars. To use, put your hands comfortably around the sensors. Be sure that your hands touch both the top and the bottom of the sensors. Hold firm, but not too tight or loose. Both hands must make contact with the sensors for the Console to detect a pulse. After the Console detects four stable pulse signals, your initial pulse rate will be shown.

Once the Console has your initial heart rate, do not move or shift your hands for 10 to 15 seconds. The Console will now validate the heart rate. Many factors influence the ability of the sensors to detect your heart rate signal:

• Movement of the upper body muscles (including arms) produces an electrical signal (muscle artifact) that can interfere with pulse detection. Slight hand movement while in contact with the sensors can also produce interference.
• Calluses and hand lotion may act as an insulating layer to reduce the signal strength.
• Some Electrocardiogram (EKG) signals generated by individuals are not strong enough to be detected by the sensors.
• The proximity of other electronic machines can generate interference.

⚠️ Use the values calculated or measured by the machine’s computer for reference purposes only.

Bluetooth® Heart Rate Armband
Your fitness machine is provided with a Bluetooth® Heart Rate Armband. When the Bluetooth® Heart Rate Armband is connected, the Console will display the Bluetooth® Heart Rate Device icon.

⚠️ If you have a pacemaker or other implanted electronic device, consult your doctor before using a Bluetooth® armband or other Bluetooth® heart rate monitor.

* The custom workout, Bowflex™ radio, and voice coaching features and certain videos require a subscription to the premium features of the Bowflex™ JRNY™ app. The Bowflex™ JRNY™ subscription must be purchased separately by downloading the JRNY™ app onto your phone or tablet and subscribing within the downloaded app or (for United States customers only) directly from Nautilus, Inc. by calling 800-269-4216. This feature may not be available in all countries.
The Heart Rate Armband should be worn on the upper portion of your forearm, with the Heart Rate Sensor to the inside of your forearm. It should be snug enough not to move around on your arm, but not so tight that it restricts blood circulation.

**Note:** Be sure to remove the protective cover from the Heart Rate Sensor before use.

1. Put the Bluetooth® Heart Rate Armband onto the upper portion of your forearm.
2. Confirm that Bluetooth® is active on the machine. If the Bluetooth® icon is blue, then it is active. If the icon is red, then Bluetooth® must be activated. To activate Bluetooth®:
   a. Tap the Bluetooth® icon.
   b. Tap “Manage Bluetooth®”.
   c. Slide the option from “OFF” to “ON”.
   d. Tap Back to exit.
3. When ready to exercise, start your workout.
4. Push the On/Off LED button on the Heart Rate Armband. The LED will flash blue quickly, indicating that the armband has been activated. Be sure to only push the On/Off LED button once.
5. During your workout, the Heart Rate Armband may take up to 60 seconds to connect. When connected, the Bluetooth® Heart Rate Device icon will be displayed along with your heart rate.
   **Note:** The Armband can only be connected once to an active workout. If the On/Off LED button is pushed after being connected, the workout must be restarted.

At the end of your workout, push the On/Off LED button to disconnect and deactivate your Heart Rate Armband.

If you press the On/Off LED button and the LED flashes red several times, the battery is low and should be charged. To charge the Bluetooth® Heart Rate Armband, connect the Charging Cable to the Charging Terminals on the inside of the Sensor. Connect the Charging Cable to a powered USB Port. The LED will flash red and green while charging. When fully charged, the LED will be green continuously.

**Heart Rate Calculations**

Your maximum heart rate usually decreases from 220 Beats Per Minute (BPM) in childhood to approximately 160 BPM by age 60. This fall in heart rate is usually linear, decreasing by approximately one BPM for each year. There is no indication that training influences the decrease in maximum heart rate. Individuals of the same age could have different maximum heart rates. It is more accurate to find this value by completing a stress test than by using an age related formula.

Your at-rest heart rate is influenced by endurance training. The typical adult has an at-rest heart rate of approximately 72 BPM, whereas highly trained runners may have readings of 40 BPM or lower.

The Heart Rate table is an estimate of what Heart Rate Zone (HRZ) is effective to burn fat and improve your cardiovascular system. Physical conditions vary, therefore your individual HRZ could be several beats higher or lower than what is shown.

The most efficient procedure to burn fat during exercise is to start at a slow pace and gradually increase your intensity until your heart rate reaches between 60 – 85% of your maximum heart rate. Continue at that pace, keeping your heart rate in that target zone for over 20 minutes. The longer you maintain your target heart rate, the more fat your body will burn.
The graph is a brief guideline, describing the generally suggested target heart rates based on age. As noted above, your optimal target rate may be higher or lower. Consult your physician for your individual target heart rate zone.

**Note:** As with all exercises and fitness regimens, always use your best judgment when you increase your exercise time or intensity.

### FAT-BURNING TARGET HEART RATE

**Maximum Heart Rate**

**Target Heart Rate Zone**
(keep within this range for optimum fat-burning)

---

**Speakers**

To play audio through the speakers on your machine, open an App on the Console and allow it to stream audio.

**Note:** Though your machine is Bluetooth® enabled, it is unable to receive and play audio across a Bluetooth® connection from your device or stream audio from the machine to your Bluetooth® device (such as Bluetooth® headphones).
Fitness Basics

Frequency
To maintain good health, lose weight and improve your cardiovascular endurance, try and complete the Custom Workouts* on the Bowflex™ Max Trainer™ machine as recommended to you. These workouts have been created for your current fitness level based on the results of the Fitness Assessment workout.

If the Custom Workouts are not available to you, try and use the Bowflex™ Max Trainer™ machine a minimum of 3 times per week, around 14 minutes each day. If you are new to exercise (or returning to a regular exercise program), and you are unable to comfortably complete 14 minutes of continuous exercise at one time, just do 5 – 10 minutes, and gradually increase your workout time until you can reach a 14 minute total.

If your schedule is busy, and you are unable to fit 14 minutes of continuous exercise into your day, try accumulating 14 minutes by doing multiple shorter workouts on the same day. For example, 7 minutes in the morning and 7 minutes in the evening. This may be a great way to start your cardio training if you are new to vigorous activity.

A great place to start your new exercise routine is to perform the Fitness Assessment workout on the Bowflex™ Max Total™ machine The Fitness Assessment workout provides your current physical level, allowing it to create custom workouts* for you. For best results, combine your Bowflex™ Max Trainer™ cardio machine workouts with a strength training program using a Bowflex™ home gym or Bowflex™ SelectTech™ dumbbells, and follow the Bowflex™ Body Weight Loss Guide included in this manual.

Consistency
Busy work schedules, family obligations and daily chores can make it difficult to fit regular exercise into your life. Try these tips to increase your chances of success:

• Schedule your workouts the same way you schedule meetings or appointments. Select specific days and times each week, and try not to change your workout times.
• Make a commitment to a family member, friend or spouse, and encourage each other to stay on track each week. Leave messages with friendly reminders to be consistent, and keep each other accountable.
• Make your workouts more interesting by alternating between steady state (single-speed) workouts and interval training (varied speed) workouts. The Bowflex™ Max Trainer™ cardio machine is even more fun when you add this kind of variety.

Apparel
It is important to wear appropriate, safe and comfortable footwear and clothing when using the Bowflex™ Max Trainer™ cardio machine, including:

• Rubber-soled athletic walking or running shoes.
• Exercise clothing that allows you to move freely, and keep comfortably cool.
• Athletic support that provides stability and comfort.
• Exercise friendly water bottle for constant hydration.

* The custom workout, Bowflex™ radio, and voice coaching features and certain videos require a subscription to the premium features of the Bowflex™ JRNY™ app. The Bowflex™ JRNY™ subscription must be purchased separately by downloading the JRNY™ app onto your phone or tablet and subscribing within the downloaded app or (for United States customers only) directly from Nautilus, Inc. by calling 800-269-4216. This feature may not be available in all countries.
Warm-Up *

Before you use your Bowflex™ Max Trainer™ cardio machine, consider doing these dynamic warm-up stretches, which will help prepare your body for the workout:

**Dynamic Knee Hug**
Stand with the feet together. Bring one knee forward and up toward the chest. Place the hands around the shin and pull the knee into the chest. Release the stretch by putting the foot on the floor. Each repetition of the sequence should take 1 to 3 seconds. Repeat as a continuous, controlled, fluid sequence 10 or 20 times. Repeat the stretch with the other leg.

**Dynamic Knee Bend**
Stand with the feet together. Hold onto a wall for balance with one hand, if necessary. Raise the heel of one foot toward the gluteals. Release the stretch by putting the foot on the floor. Each repetition of the sequence should take 1 to 3 seconds. Repeat as a continuous, controlled, fluid sequence 10 or 20 times. Repeat the stretch with the other leg.

**Dynamic Knee Kick**
Stand tall and hold one leg up with the hands at hip height, keeping the knee bent. Hold onto a wall for balance with one hand, if necessary. Straighten the knee as far as comfortably possible. Release the stretch by bending the knee. Each repetition of the sequence should take 1 to 3 seconds. Repeat as a continuous, controlled, fluid sequence 10 or 20 times. Repeat the stretch with the other leg.

**Dynamic Twist**
Stand with the feet shoulder-width apart. Bend the elbows; hold the arms out to the sides. Twist the upper body to one side and then the other side as far as comfortably possible. Each repetition of the sequence should take 1 to 3 seconds. Repeat as a continuous, controlled, fluid sequence 10 or 20 times.

**Dynamic Bent Knee Heel Press**
Stand with one foot forward and one foot back, hip-width apart and feet facing forward. Hold onto a wall for balance with one hand, if necessary. Bend both knees putting weight on the back heel. Release the stretch by returning to the start position. Each repetition of the sequence should take 1 to 3 seconds. Repeat as a continuous, controlled, fluid sequence 10 or 20 times. Repeat the stretch with the other leg. Touch a wall or hold onto something for balance, if necessary.

**Dynamic Side Reach**
Stand with the feet apart, the knees slightly bent and the arms at the sides of the body. Reach with one hand above the head and lean over to the opposite side. Release the stretch by returning to the start position. Then reach with the other hand to the opposite side. Use the other arm to support the body weight on the thigh, if necessary. Each repetition of the sequence should take 1 to 3 seconds. Repeat as a continuous, controlled, fluid sequence 10 or 20 times.
Workouts

Follow these guidelines to ease yourself into a weekly exercise regimen. Use your judgment and/or the advice of your physician or health care professional to find the intensity and level of your workouts.

⚠ Consult a physician before you start an exercise program. Stop exercising if you feel pain or tightness in your chest, become short of breath, or feel faint. Contact your doctor before you use the machine again. Use the values calculated or measured by the machine’s computer for reference purposes only. The heart rate displayed on the console is an approximation and should be used for reference only.

Steady State and Interval Training are 2 types of workouts you can do on your Bowflex™ Max Trainer™ cardio machine:

Steady State workouts

A Steady State workout involves slowly increasing your workout speed to a challenging, but comfortable, speed you can hold for most of your workout. Getting your Heart Rate up into the Fat-Burning, Heart Zone zone for an entire workout would be a great Steady State workout. For example, holding a 6 calories per minute Burn Rate pace for the entire workout, except during the warm-up and cool-down. Steady State workouts can help you build exercise confidence, stamina and endurance.

Interval Training workouts

An Interval Training workout involves adjusting your workout intensity for specific lengths of time to raise and lower your breathing rate, heart rate and calorie burn. Using the Calorie Burn Rate display, you can adjust the intensity of your workout quickly to achieve your goals.

The Bowflex™ Max Trainer™ cardio machine combines “SPRINT” and “RECOVER” segments to create an Interval workout. During a “SPRINT” segment, push yourself to a level of high calorie burn that can be repeated for the total number of intervals. Then during the “RECOVER” segments, allow yourself to decrease the intensity and prepare for the next “SPRINT” segment. These extreme changes in intensity, along with pushing your body toward exhaustion, is where the maximum benefits are gained from Interval Training workouts.

Interval Training workouts can provide variety, increase calorie burn, and improve fitness.

The Bowflex™ Max Trainer™ cardio machine is designed to be low impact, and both Steady State and Interval Training workouts should feel more comfortable than running outside on a hard surface or a treadmill.

After Burn Rate

At the end of an intense Interval Training workout, your body will actually need to expend additional energy to replenish your body’s reserves. This additional amount of energy that your body will be using is the After Burn Rate, or EPOC (Excess Post-exercise Oxygen Consumption). The level of this additional energy requirement for your body is directly related to many factors. Some factors are your physical fitness level, intensity level of the interval training workout, length of oxygen deprivation during the workout, and physical demands during the recovery phase.

In summary, your body may be burning more calories after an intense Max Interval workout.
**Workout Log**

Use this log to track your workouts and progress. Tracking your workouts helps you stay motivated and achieve your goals.

**Cool-Down** *

When you are done using your cardio machine, consider doing these relaxing stretches, which will help your body recover from the workout and make you more flexible:

**Lying Leg Raise**

Lie on the floor face up with the legs slightly bent. Lift one leg up toward the ceiling, keeping the knee straight. Place the hands (or a strap) around the thigh and move the leg closer to the head. Hold the stretch for 10 to 30 seconds. Repeat the stretch on the other leg. Keep the head on the floor and do not round the spine.

Side Lying Knee Bend
Lie on the floor on one side of the body and rest the head on the lower arm. Bend the top knee and hold the ankle with the same-side hand, then pull the heel toward the gluteals. Hold the stretch for 10 to 30 seconds. Lie on the other side and repeat the stretch with the other leg. Remember to hold the knees close together.

Lying Figure Four
Lie on the floor face up with the legs bent. Place one foot across the thigh of the opposite leg in the figure four position. Reach for the leg on the floor and pull it toward the chest. Hold the stretch for 10 to 30 seconds. Repeat the stretch with the other leg. Keep the head on the floor.

Seated Twist
Sit on the floor and extend the legs straight out in front of the body with the knees slightly bent. Place one hand on the floor behind the body and the other hand across the thigh. Twist the upper body as far as comfortably possible to one side. Hold the stretch for 10 to 30 seconds. Repeat the stretch on the other side.

Seated Figure Four
Sit on the floor and extend one leg straight out in front of the body. Place the foot of the other leg across the thigh in the figure four position. Move the chest toward the legs, pivoting at the hip. Hold the stretch for 10 to 30 seconds. Repeat on the other leg. Use the arms to support the back.

Dynamic Heel Drop
Place the ball of one foot on the edge of a step or staircase. Place the other foot slightly in front. Hold onto a wall for balance with one hand, if necessary. Lower the heel of the back foot as far as comfortably possible, keeping the knee straight. Release the stretch by lifting the heel as high as comfortably possible. Each repetition of the sequence should take 1 to 3 seconds. Repeat as a continuous, controlled, fluid sequence 10 or 20 times. Repeat the stretch with the other leg.
How Often Should You Exercise

Consult a physician before you start an exercise program. Stop exercising if you feel pain or tightness in your chest, become short of breath, or feel faint. Contact your doctor before you use the machine again. Use the values calculated or measured by the machine’s computer for reference purposes only. The heart rate displayed on the console is an approximation and should be used for reference only.

- 3 times a week for about 14 minutes each day.
- Schedule workouts in advance and try to follow the schedule.

Note: If you are new to exercise (or returning to a regular exercise program), and you are unable to comfortably complete 14 minutes of continuous exercise at one time, just do 5 – 10 minutes, and gradually increase your workout time until you can reach a 14 minute total.

Intensity of Workout

To increase the intensity of your workout:

- Push yourself to increase the number of Pedal revolutions per minute.
- Place your feet further out toward the rear of the Pedals.
- Increase the Intensity Level and keep your RPM consistent, or increase it as well.
- Use your upper and lower body at different levels.
- Shift your grip location on the Handlebars to work out other parts of your upper body.

Hand Placement (Grip Selection)

This fitness machine is equipped with multiple Handlebars which allow for a variety of different types of workouts. As you progress on your fitness routine, shift your hand placement to target different muscle groups.

Exercise on this machine requires coordination and balance. Be sure to anticipate that changes in speed and resistance level can occur during workouts, and be attentive in order to avoid loss of balance and possible injury.

The Dynamic Handlebars allow for a variety of upper body workouts. When starting out, place your hands where it feels most comfortable and stable on the Dynamic Handlebars.

The Static Handlebars below the Console Assembly can also be used to add stability during a workout, as well as provide your heart rate.

For a workout focused on legs, lean in until your forearms run along the Aerobars with your hands upward. When leaning in, be aware of the motion of the Dynamic Handlebars during the workout.

Mounting and Dismounting Your Machine

Care should be used when mounting or dismounting the machine.

Be aware that the Pedals and the Handlebars are connected and when either of these parts move the other does as well. In order to avoid possible serious injury, grasp the Static Handlebars to steady yourself.

Be sure there is nothing under the Pedals or in the Air Resistance Fan before moving anything on the machine.

To mount your fitness machine:

1. Move the Pedals until the one nearest to you is in the lowest position.
2. Grasp the Static Handlebars under the Console Assembly.
3. Steadying yourself with the Static Handlebars, step up onto the lowest Pedal and place your other foot onto the opposite Pedal.

Note: "Bottomed out" is when the User is unable to start a workout because the Pedals will not move. If this occurs, safely grasp the Static Handlebars and apply your weight to the heel of the higher foot. While still grasping the Static Handlebar, lean back slightly applying more weight onto the heel. Once the Pedals begin to move, resume your intended workout.
To dismount your fitness machine:
1. Move the Pedal you want to dismount from to the highest position, and bring the machine to a complete stop.

⚠️ This machine is not equipped with a free-wheel. Pedal speed should be reduced in a controlled manner.

2. Grasp the Static Handlebars under the Console to steady yourself.
3. With your weight on the lowest foot, swing the upper foot off the machine and down onto the floor.
4. Step off of the machine and release your grip from the Static Handlebars.

**Initial Set-Up**
1. Plug in the machine to a functioning wall outlet. The machine will start up, and the red Status LED will activate.
   
   If the machine does not start up immediately, then the Console may need to charge. It will take about 60 minutes to charge the machine enough to activate it.  
   
   **Note:** The Console may go to sleep if it does not receive any input after charging. Touch the screen of the Console to wake up the machine.

   2. When charged, the machine will activate and display the Welcome - Connect Wifi screen. Tap on Connect.

   **Note:** A Wifi connection is required to use your Bowflex™ Max Total™ machine. If you do not have a Wifi connection available, contact your Bowflex™ Max Trainer™ Representative or your local distributor immediately for further assistance.

   3. The Console will display the list of available Wifi connections. Tap on the desired Wifi connection, and enter the password. Tap on Connect.

   4. The Console will test and connect to the Wifi connection.

   If the Console displays an Update Available screen, tap on the Agree button. The Console will update the software.

   5. With a Wifi connection established, tap on Back.

   6. The Console will open the Bowflex™ JRNY™ App. Tap on Get Started.

   7. The Console will display the options screen. Click on the Log In option. Follow the prompts to register your new fitness machine. When registration is completed, your fitness machine is now ready for use.

   8. The Console will display the Home tab. The Home tab will encourage you to do your Fitness Assessment workout to get a custom workout*, or to do a Max 14 Interval workout.

**Getting Started**
1. Place the fitness machine in your workout area.

   ⚠️ Place the machine on a clean, hard, level surface, free from unwanted material or other objects that may hamper your ability to move freely. A rubber mat can be used below the machine to prevent the release of static electricity and protect your flooring.

   The machine can be moved by one or more persons. Make sure that your own physical strength is capable of safely moving the machine.

   2. Examine for any objects below the Pedals and in the Air Resistance Fan. Be sure it is clear.

   3. Connect the power cord to the machine and into a grounded AC Wall Outlet.

   **Note:** If the Console does not turn on after connecting the power, the Console may need to be charged to be able to activate. Charge the Console until it is able to activate.

   4. If you use a Heart Rate Monitor, follow the Heart Rate Monitor directions.

   5. To mount the machine, move the Pedals until the one nearest you is in the lowest position.

   **Care should be used when mounting or dismounting the machine.**

   Be aware that the Pedals and the Handlebars are connected and when either of these parts move the other does as well. In order to avoid possible serious injury, grasp the Static Handlebars to steady yourself.

* The custom workout, Bowflex™ radio, and voice coaching features and certain videos require a subscription to the premium features of the Bowflex™ JRNY™ app. The Bowflex™ JRNY™ subscription must be purchased separately by downloading the JRNY™ app onto your phone or tablet and subscribing within the downloaded app or (for United States customers only) directly from Nautilus, Inc. by calling 800-269-4216. This feature may not be available in all countries.

Assembly / Owner’s Manual
6. Grasp the Static Handlebars.

7. Steadying yourself with the Static Handlebars, step up onto the lowest Pedal and place your other foot onto the opposite Pedal.
   
   **Note:** “Bottomed out” is when the User is unable to start a workout because the Pedals will not move. If this occurs, safely grasp the Static Handlebars and apply your weight to the heel of the higher foot. While still grasping the Static Handlebar, lean back slightly applying more weight onto the heel. Once the Pedals begin to move, resume your intended workout.

8. You are now in position to begin a workout.

   **Note:** When operating the Bowflex™ Max Trainer™ machine, be sure the Legs are moving in the direction as shown on the Crank Cover.

---

**Power-Up / Home Tab**

The Console will enter Power-Up / Home Tab if it is plugged into a power source, the Console display is touched, or if it receives a signal from the RPM sensor as a result of pedaling the machine.

**Note:** If the Status LED turns off briefly every 2 seconds, then the Console needs to charge before the machine can start. The Console will charge for about 60 minutes.

---

**Paused / Workout Complete Mode**

1. To Pause a workout, stop pedaling during the workout.

   **Note:** The Console will automatically pause if there is no RPM signal for 5 seconds, or if you tap the screen and tap the Pause button.

   When paused, the Console will display the Play and Stop buttons.

2. To continue the workout, begin pedaling or tap the Play button.

   To end the workout before completing it, tap Stop.

3. After the workout, the Console will display the Workout Complete values (Total Time, Total Intervals, Total Calories, Average Sprint Burn Rate, Average Heart Rate, Average RPM, and Average Resistance).

4. Tap Continue.

5. The Console will go to the Overview of the Latest Workout of the JOURNAL tab.

---

**Power-Off or Restart the Machine**

**Note:** When active, the Bowflex™ Max Total™ machine checks for software updates and installs them. If the machine is de-activated for a period of time, it may try to install updates when restarted.

1. To turn off the machine, push and hold down for three seconds the On/Off button on the back of the Console.

2. The Console will show the available options: Power-Off or Restart the machine.

3. Tap the desired option.

4. The Console will ask you to confirm your selection. Tap the selected option.

   The machine will shut down, and then restart if that was the selected option.

To restart a machine with power supplied to it, unplug the power supply and re-connect it or hold down the On/Off button for 3 seconds.
Read all maintenance instructions fully before you start any repair work. In some conditions, an assistant is required to do the necessary tasks.

⚠️ Equipment must be regularly examined for damage and repairs. The owner is responsible to make sure that regular maintenance is done. Worn or damaged components must be repaired or replaced immediately. Only manufacturer supplied components can be used to maintain and repair the equipment.

If at any time the Warning labels become loose, unreadable or dislodged, replace the labels. If purchased in US/Canada, contact Customer Service for replacement labels. If purchased outside US/Canada, contact your local distributor for them.

To reduce the risk of electrical shock or unattended/unsupervised usage, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

Daily:

Before each use, examine the exercise machine for loose, broken, damaged, or worn parts. Do not use if found in this condition. Repair or replace all parts at the first sign of wear or damage. After each workout, use a damp cloth to wipe your machine and Console free of sweat.

Note: Avoid excessive moisture on the Console.

Weekly:

Check for smooth roller operation. Wipe the machine to remove dust, dirt, or grime. Clean the rails and surface of the rollers with a damp cloth.

Apply silicone lubricant to a dry cloth and wipe the rails to eliminate roller noise.

⚠️ Silicone lubricant is not intended for human consumption. Keep out of reach of children. Store in a safe place.

Note: Do not use petroleum based products.

Monthly or after 20 hours:

Make sure all bolts and screws are tight. Tighten as necessary.

NOTICE: If necessary, only use a mild dish soap with a soft cloth to clean the Console. Do not clean with a petroleum based solvent, automotive cleaner, or any product that contains ammonia. Do not clean the Console in direct sunlight or at high temperatures. Be sure to keep the Console free of moisture.

Introduction and Overview

Welcome to the Bowflex™ Body Weight Loss Guide. This guide is designed to be used with your Bowflex™ equipment and will help you:

• Lose weight and get lean
• Improve your health and wellness
• Increase your energy and vitality

Consult a physician before you start an exercise program or a new health and diet plan. Stop exercising if you feel pain or tightness in your chest, become short of breath, or feel faint. Contact your doctor before you use the machine again. Use the values calculated or measured by the machine’s computer for reference purposes only. The heart rate displayed on the console is an approximation and should be used for reference only.

By focusing on the main three elements of the Bowflex™ Body Weight Loss Guide—quality, balance, and consistency—you’ll be able to reach and maintain your weight loss and fitness goals for the next six weeks and beyond.

• Quality — The emphasis of this plan is on eating more whole foods and getting the most nutrients from your calories as possible. Making the majority of your diet from foods that have a single ingredient (for example fruits, vegetables, fish, lean protein, eggs, beans, nuts, and whole grains) provides the vitamins, minerals, fiber, protein, and healthy fats your body needs.

• Balance — Each of the meals and snacks in this guide have a source of fiber or smart carbohydrate, protein, and healthy fat to keep your energy levels consistent throughout the day to fuel your workouts. By having this balance you’ll feel fuller longer, which is critical to weight loss success.

• Consistency — Getting about the same number of calories each day is important for your metabolism and your mindset. If you overdo it one day, don’t try to make up for it the next day by not eating or cutting your calories drastically. Get right back on track by following this guide!

Results & Expectations

Results will vary depending on your age, starting weight, and exercise level. By adhering to a diet and exercise routine, you may lose 1-3 lbs per week and experience increased energy levels.

5 Tips for Long-Term Success

1. Keep a food log including hunger levels and water intake. Free online food logs and mobile apps are available at www.myfitnesspal.com and www.loseit.com

2. Weigh and/or take measurements weekly—no more and no less. Weighing weekly rather than daily or every other day is best. You’ll track your progress and keep yourself in check without getting discouraged if the scale doesn’t move for a few days. And remember, weight is just a number and it’s influenced by muscle gain as well as fat loss. Feeling how your clothes fit can often be a better indicator of progress as your body adapts to exercise and nutrition changes.

3. Measure portions—To avoid portion creep, use measuring cups and spoons for grains (rice, pasta, cereal), beans, nuts, oils, and dairy. Use the Portion Sizes Guide for other foods.

4. Plan ahead—Make a meal plan for the week or log your food a day in advance. Planning sets you up for success, especially for social events and eating out.

5. Practice your desired long-term habits—it’s easy to justify poor eating choices when you’re only focused on the short term. Focus on the long-term satisfaction of a slimmer, healthier you rather than the temporary gratification you’ll get from splurging.

How to Use this Guide

• Eat breakfast within 90 minutes of waking up and balance your meals and snacks throughout the day
  – Don’t go longer than 5-6 hours without eating
  – If you’re not used to eating breakfast, start out small with a piece of fruit and have something else 1-2 hours later. Your body adapts to not eating breakfast, but as soon as you start eating early in the day and cutting back on dinner portions you’ll notice your hunger will increase. This is a good sign your metabolism is working!

• Mix and match meal options
  – Select 1 option from the appropriate meal plan (male or female) for breakfast, lunch, and dinner, paying close attention to portion sizes
  – Select 1-2 snack options per day
  – You have the option to substitute one snack for one treat under 150 calories
Use the meal plan, sample options, and grocery list to create your own meals for more variety. You can swap out any type of protein, vegetables or smart carbs for the suggested meal options. For example:

- Turkey for tuna
- Any fish or seafood for chicken
- Cooked vegetables instead of salad

**Eat your calories**
- Cut out high calorie beverages like soda, juices, coffee drinks, and alcohol
- Stick with water, unsweetened tea, and coffee. Aim for a minimum of 64 oz (1.9 liters) of water per day to stay well hydrated

**If you're still hungry after or in between meals:**
- Have a glass of water and wait 15-20 minutes. Many times we mistake thirst (or even boredom!) for hunger. Wait out the initial urge to eat and sometimes it will pass.
- If you're still hungry after waiting 15-20 minutes have a snack or mini-meal with fruit, vegetables, and protein.

---

**If your goal is muscle gain or strength:**

- Use the same meal plan but increase portion sizes in the same ratios to increase the total number of calories you eat every day. For example, increase portion sizes of protein and smart carbs at meals by 50%. Adding a snack is another option to meet your body's increased calorie needs in order to gain muscle and strength.
- Focus on post-workout nutrition by having one of your snacks within 30 minutes after you complete your workout. Make sure to have a combination of carbohydrates such as fruit with protein (yogurt, milk, or protein powder) to promote muscle growth and recovery. Chocolate milk is also a great option.

---

**Meal Plan Overview**

The female meal plan provides about 1400 calories, and the male plan provides about 1600 calories, of high quality nutrition to not only help you lose weight and feel great but get the most out of your calories. The vitamins, minerals, and antioxidants from eating mostly whole foods help support optimal health. These calorie levels will result in healthy weight loss for the majority of people. Keep in mind that everyone's metabolism is very different depending on age, height, weight, activity level, and genetics. Pay close attention to your weight, hunger levels, and energy and adjust your calories if needed.

**Follow these guidelines if you're over 55:**
- If you're over 55, you need fewer calories because your metabolism slows as you age. Stick with three meals with one optional snack per day.

**Follow these guidelines if you're under 25:**
- If you're under 25 you may need more calories. Add another snack if you feel low on energy or are extremely hungry.

---

**Breakfast**

Breakfast includes a smart carb, fruit, and a source of protein, which will also have fat. With a balance of carbohydrates and fiber from the smart carb and fruit combined with protein and fat, you'll energize your day and help control hunger levels throughout the day.

---

**Snacks**

Each snack is a balance of carbohydrates and protein to keep your blood sugar more consistent, which means you won’t experience hunger and energy level spikes and drops.

This happens when you have a high carb-only snack like chips, candy, soda, crackers, or pretzels.

---

**Lunch and Dinner**

Lunch combines filling fiber from vegetables and smart carbs with a lean, or low-fat, protein. The healthy fat can come either from the protein added during cooking (nuts on a salad) or as a dressing or sauce (such as oil and vinegar salad dressing).
Here's an overview of what an ideal day looks like:
(See Portion Size Guide for proper serving sizes)

**Breakfast**

- smart carb
- fruit
- protein/fat

**Snack #1**

- smart carb
- protein

**Lunch**

- smart carb
- protein
- healthy fat
- veggies

**Snack #2**

- smart carb
- protein

**Dinner**

- smart carb
- protein
- healthy fat
- veggies
### Breakfast Options

<table>
<thead>
<tr>
<th></th>
<th>Fruit</th>
<th>Smart Carb</th>
<th>Protein/Fat</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Fruit and Nut Oatmeal</strong></td>
<td>Cook plain oats in water. Top with fruit, nuts, milk, cinnamon, and honey.</td>
<td>Berries or banana</td>
<td>Plain oats (Regular or quick-cook)</td>
</tr>
<tr>
<td><strong>Egg Muffin</strong></td>
<td>Cook egg/s. Toast bread and top with 1 slice of cheese, 1 slice of ham, and tomato.</td>
<td>Tomato</td>
<td>English muffin or sandwich thin</td>
</tr>
<tr>
<td><strong>Yogurt Power Parfait</strong></td>
<td>Top yogurt with fruit. Sprinkle with 1 serving of nuts, 2-3 tbsp wheat germ, or ground flaxseed, 1 tbsp oats, and cinnamon.</td>
<td>Chopped fruit of your choice</td>
<td>Oats, wheat germ, and ground flaxseed</td>
</tr>
<tr>
<td><strong>On the Go PB &amp; Apple Sandwich</strong></td>
<td>Toast bread. Spread on peanut butter, thin slices of ½ an apple, and 1 teaspoon of honey.</td>
<td>Sliced apple</td>
<td>Sandwich thin, bread, or bagel thin</td>
</tr>
</tbody>
</table>

### Lunch & Dinner Options

<table>
<thead>
<tr>
<th></th>
<th>Lean Protein</th>
<th>Smart Carb</th>
<th>Veggies</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Pork Loin, Sweet Potato &amp; Green Beans</strong></td>
<td>Grilled or baked pork loin</td>
<td>Baked Sweet Potato</td>
<td>Green Beans</td>

<tr>
<td><strong>Chicken Stir Fry</strong></td>
<td>Flavor with 2 tablespoon teriyaki sauce</td>
<td>Chicken breast or boneless skinless thigh</td>
<td>Brown or wild rice</td>
</tr>
<tr>
<td><strong>Steak Tacos with Side Salad</strong> (3 for males, 2 for females)</td>
<td>Top with salsa, cilantro, and sprinkle of shredded cheese</td>
<td>Flank or sirloin steak</td>
<td>Corn tortillas</td>
</tr>
<tr>
<td><strong>Whole Wheat Pasta with Shrimp or Cannellini Beans &amp; Marinara Sauce</strong></td>
<td>Shrimp (frozen or fresh) or cannellini beans</td>
<td>Whole wheat pasta</td>
<td>Steamed broccoli</td>
</tr>
<tr>
<td><strong>Bunless Burgers with Oven Fries, Corn, &amp; Salad</strong></td>
<td>Grill burgers. Bake sliced potatoes on sprayed cookie sheet for 25-30 minutes @ 425°F.</td>
<td>93% lean ground beef or turkey</td>
<td>Oven baked fries</td>
</tr>
<tr>
<td><strong>Tuna &amp; Avocado Wrap with Vegetable Soup</strong></td>
<td>Use 3oz of tuna (1 can). Top with lettuce, tomato, avocado, and mustard.</td>
<td>Tuna</td>
<td>High-fiber wrap</td>
</tr>
</tbody>
</table>
Snack Options

<table>
<thead>
<tr>
<th>Smart Carb</th>
<th>Protein</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 medium apple</td>
<td>10-15 almonds</td>
</tr>
<tr>
<td>Baby carrots</td>
<td>2 tbsp hummus</td>
</tr>
<tr>
<td>1 serving of crackers*</td>
<td>1 string cheese</td>
</tr>
<tr>
<td>Energy or protein bar with &lt;200 calories*</td>
<td></td>
</tr>
</tbody>
</table>

*See www.Bowflex.com/Resources for brand recommendations

Optional Treats

You have the choice of replacing Snack #2 with a 100-150 calorie treat. You can have an optional treat every day but for optimal health it is recommended to limit small splurges to 3-4 times per week. Use the approach that works best for you. Here are a few examples:

- ½ cup lowfat ice cream
- 1 small bag of baked potato chips
- 4oz of wine or 12oz light beer
- 3 cups of air-popped or light popcorn

Sample 3 Day Plan

Based on each of the meal options listed above, a typical 3 day plan could look like this:

<table>
<thead>
<tr>
<th></th>
<th>Day 1</th>
<th>Day 2</th>
<th>Day 3</th>
</tr>
</thead>
<tbody>
<tr>
<td>Breakfast</td>
<td>Egg muffin</td>
<td>Power yogurt parfait</td>
<td>Fruit + nut oatmeal</td>
</tr>
<tr>
<td>Snack 1</td>
<td>Apple with almonds</td>
<td>Nut Thins® + string cheese</td>
<td>Baby carrots and hummus</td>
</tr>
<tr>
<td>Lunch</td>
<td>Tuna &amp; avocado wrap with soup</td>
<td>Leftovers from dinner- day 1</td>
<td>Leftovers from dinner- day 2</td>
</tr>
<tr>
<td>Optional Snack 2 or Treat</td>
<td>½ cup ice cream bar</td>
<td>Energy bar</td>
<td>100 calorie bag of light popcorn</td>
</tr>
<tr>
<td>Dinner</td>
<td>Shrimp pasta</td>
<td>Chicken stir fry</td>
<td>Bunless burgers</td>
</tr>
</tbody>
</table>
### Portion Size Guide

Each of the items listed are for one serving

<table>
<thead>
<tr>
<th>MALE</th>
<th>FEMALE</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>PROTEIN</strong></td>
<td></td>
</tr>
<tr>
<td>2 eggs</td>
<td>1 egg</td>
</tr>
<tr>
<td>5oz chicken, fish, lean meat, or tofu</td>
<td>3oz chicken, fish, or lean meat</td>
</tr>
<tr>
<td>2/3 cup beans or lentils*</td>
<td>1/2 cup beans or lentils*</td>

<tr>
<td>1/2 cup lowfat ice cream</td>
<td></td>
</tr>
<tr>
<td>1 small bag of baked potato chips</td>
<td></td>
</tr>
<tr>
<td>1oz dark chocolate</td>
<td></td>
</tr>
<tr>
<td>4oz of wine or 12oz light beer</td>
<td></td>
</tr>
<tr>
<td>3 cups air-popped or light popcorn</td>
<td></td>
</tr>
</tbody>
</table>

* some foods are a combination of protein and carbs or protein and fat

---

**Portion Samples:**

- 1 cup = baseball
- 1/2 cup = lightbulb
- 1 oz or 2 tbsp = golf ball
- 1/4 cup nuts = Altoids tin
- 3 oz chicken or meat = deck of cards
- 1 medium potato = computer mouse
- 1 medium piece of fruit = tennis ball
- 1 -1/2 oz cheese = 3 dice
## Grocery List

### BREAD & GRAINS

<table>
<thead>
<tr>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>100% whole wheat bread</td>
</tr>
<tr>
<td>Sprouted grain breads</td>
</tr>
<tr>
<td>Light or whole wheat english muffins</td>
</tr>
<tr>
<td>Sandwich or bagel thins</td>
</tr>
<tr>
<td>Corn or low-carb whole wheat tortillas</td>
</tr>
<tr>
<td>High-fiber wraps</td>
</tr>
<tr>
<td>Plain oats: 1 minute or old fashioned</td>
</tr>
<tr>
<td>Whole grains: brown rice, bulgar, barley, quinoa, couscous</td>
</tr>
</tbody>
</table>

**Tips:** Look for 100% whole wheat as the first ingredient. Look for 4g of fiber per slice or 5g per 2 slices of light or diet bread. Aim for bread with less than 100 calories per slice.

### DAIRY & DAIRY ALTERNATIVES

<table>
<thead>
<tr>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>Plain non-fat greek yogurt</td>
</tr>
<tr>
<td>Kefir (yogurt like drink)</td>
</tr>
<tr>
<td>Organic low-fat milk</td>
</tr>
<tr>
<td>Enriched almond or soy milk</td>
</tr>
<tr>
<td>Cheese: feta, parmesan, mozzarella, light havarti, provolone, swiss, string cheese, or single serving packages</td>
</tr>
</tbody>
</table>

### MEAT, FISH, POULTRY & PROTEIN

<table>
<thead>
<tr>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>Wild game</td>
</tr>
<tr>
<td>Salmon, halibut, tuna, tilapia, shrimp, catfish, scallops, or crab</td>
</tr>
<tr>
<td>Pork loin, pork chops, or pork roast</td>
</tr>
<tr>
<td>Chicken or turkey breast or thighs (no skin)</td>
</tr>
<tr>
<td>Eggs and 100% egg whites</td>
</tr>
<tr>
<td>Lean beef: sirloin, chuck, round, tenderloin, 93% lean (organic and grass fed is best)</td>
</tr>
<tr>
<td>Canned salmon or tuna (in water)</td>
</tr>
<tr>
<td>Nitrate-free, reduced sodium ham, turkey, chicken, or roast beef lunchmeat</td>
</tr>
<tr>
<td>Any type of bean, dry or canned low-sodium varieties</td>
</tr>
<tr>
<td>Tofu and tempeh</td>
</tr>
</tbody>
</table>

**Tips:** Look for “Choice” or “Select” cuts of meat rather than “Prime”. Prime cuts are fatter. Limit intake of highly processed meat and imitation meat products like sausage, bacon, pepperoni, and hot dogs to once a week or less.

### CRACKERS, SNACKS & ENERGY BARS

<table>
<thead>
<tr>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>Any unsalted nuts or seeds</td>
</tr>
<tr>
<td>Air-popped or light popcorn</td>
</tr>
<tr>
<td>Edamame in the pod</td>
</tr>
<tr>
<td>Energy bars</td>
</tr>
<tr>
<td>Crackers</td>
</tr>
<tr>
<td>Hummus</td>
</tr>
</tbody>
</table>

**Tips:** Limit crackers, pretzels, and chips to 2-3 servings per week. Always pair with protein such as hummus, cheese, or nuts. Look for energy bars with less than 200 calories and 20g of sugar and at least 3g of protein and 3g of fiber. Look for crackers with less than 130 calories and 4g or less of fat per serving.

### FATS & OILS

<table>
<thead>
<tr>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>Avocado</td>
</tr>
<tr>
<td>Olive, grapeseed, walnut, sesame, or flaxseed oil</td>
</tr>
<tr>
<td>Butter/spreads: look for products free of trans fats and partially hydrogenated oils on the ingredient list.</td>
</tr>
</tbody>
</table>

**Tips:** Light olive oil refers to the flavor, not the calorie content. Always measure oil and butter. Even if a fat is considered healthy, it’s still very high in calories and portions need to be controlled.

### DRESSINGS, CONDIMENTS & SAUCES

<table>
<thead>
<tr>
<th>Item</th>
</tr>
</thead>
<tbody>
<tr>
<td>Vinegars: rice, wine, balsamic</td>
</tr>
<tr>
<td>All fresh or dried herbs and spices</td>
</tr>
<tr>
<td>Mustard</td>
</tr>
<tr>
<td>Salsa and chili sauce</td>
</tr>
<tr>
<td>Marinara sauce with no high-fructose corn syrup</td>
</tr>
<tr>
<td>Lemon and lime juice</td>
</tr>
<tr>
<td>Bottled minced garlic and ginger</td>
</tr>
<tr>
<td>Low-sodium soy sauce</td>
</tr>
</tbody>
</table>

**Tips:** Look for products free of MSG, added colors, and high fructose corn syrup. Look for sauces under 50 calories per serving. Avoid cream based sauces and dressings like ranch, bleu cheese, and alfredo.

---

All fruits and vegetables, fresh and frozen, are great choices. Since every meal has one or both, your shopping cart should reflect this.
Keep It Going

Tips for continued weight loss and maintaining changes
• Keep weighing yourself weekly, even after you’ve reached your goal weight
• Continue keeping a food log. If you have your meal plan well-established, log your food every other week to keep yourself on track. Don’t feel like you have to do it every day.
• Prepare for plateaus. The scale might not budge for a few weeks or even months after some initial weight loss. This is normal and to be expected. It’s the body’s natural process for adjusting to your new lower weight. Stay focused on your long-term goal, celebrate your successes and changes, and mix up your workouts to help overcome the plateau.
• Calorie adjustments for maintaining weight loss. Once you’ve reached your goal weight, you can increase your calories 100-200 per day as long as your activity level stays the same
• Treat yourself. Have a non-food reward for each goal you hit such as a massage, a new outfit, or an outing with friends and family
• Use the resources below to find new recipes, get expert advice, and support to stay motivated

Buy Back Guarantee (if purchased in US/Canada)

We want you to know that your Bowflex™ Max Trainer™ machine is a superior product. Your satisfaction is guaranteed. If, for any reason, you are not 100% satisfied with your Bowflex™ Max Trainer™ machine, please follow the instructions below to return your merchandise and receive a refund of the purchase price, less shipping and handling.

This Bowflex™ Max Trainer™ Buy Back Guarantee applies only to merchandise purchased by consumers directly from Nautilus, Inc. This guarantee does not apply to sales made by dealers, retailers, or distributors.

1. Call a Bowflex™ Max Trainer™ Representative at 1-800-605-3369 for a Return Authorization Number (RMA). An RMA will be granted if:
   a. The Bowflex™ Max Trainer™ exercise machine was purchased directly from Nautilus, Inc.
   b. The request to return the product is within 6 weeks of the delivery date of your merchandise.

2. If an RMA is granted, the following instructions will prevent delays in the processing of your refund.
   a. The merchandise must be returned to the address given to you at the time of the Return Authorization Call.
   b. All returned merchandise must be properly packaged in good condition, preferably in the original boxes.
   c. The exterior of the boxes should be marked clearly with:
      - Return Authorization Number
      - Your Name
      - Your Address
      - Your Phone Number
   d. Additionally, a piece of paper with your name, address and phone number or copies of your original invoice should be placed in each box of merchandise.
   e. Your RMA number is time sensitive. Your shipment must be post marked within two weeks from the date the Bowflex™ Max Trainer™ Representative issued the Return Authorization Number.

Note: You are responsible for return shipping and for any damage or loss to merchandise that occur during return shipment. Nautilus recommends that you obtain tracking numbers and insure your shipment.

Unauthorized Returns

Nautilus, Inc. defines an unauthorized return as any merchandise returned to our facilities without a valid and current Return Merchandise Authorization (RMA) number issued by Nautilus. Failure to properly mark packages with a valid RMA number, or allowing an RMA number to expire, will cause Nautilus, Inc. to consider a return unauthorized. Any merchandise returned without a RMA number will not be subject to a refund or credit and Nautilus will discard the product. The customer assumes all shipping and handling charges for any unauthorized return.
Who Is Covered
This warranty is valid only to the original purchaser and is not transferable or applicable to any other person(s).

What Is Covered
Nautilus, Inc. warrants that this product is free from defects in materials and workmanship, when used for the purpose intended, under normal conditions, and provided it receives proper care and maintenance as described in the Product's Assembly and Owner's manual. This warranty is good only for authentic, original, legitimate machines manufactured by Nautilus, Inc. and sold through an authorized agent and used in the United States or Canada.

Terms
Warranty terms for products purchased in US/Canada are as stated below.

• Frame 3 years
• Parts 3 years
• Labor 90 days

(Labor support does not include the installation of replacement parts involved in the initial product assembly and preventative maintenance services. All repairs covered under the labor portion of the warranty must be preauthorized by Nautilus. The customer will be responsible for a minimal trip charge.)

For warranty & service of products purchased outside US/Canada, please contact your local distributor. To find your local international distributor, go to: www.nautilusinternational.com

How Nautilus Will Support the Warranty
Throughout the terms of the warranty coverage, Nautilus, Inc. will repair any machine that proves to be defective in materials or workmanship. Nautilus reserves the right to replace the product in the event a repair is not possible. When Nautilus determines replacement is the correct remedy, Nautilus may apply a limited credit reimbursement toward another Nautilus, Inc. brand Product, at our discretion. This reimbursement may be prorated based on length of ownership. Nautilus, Inc. provides repair service within major metropolitan areas. Nautilus, Inc. reserves the right to charge the consumer for travel outside these areas. Nautilus, Inc. is not responsible for dealer labor or maintenance charges beyond the applicable warranty period(s) stated herein. Nautilus, Inc. reserves the right to substitute material, parts or products of equal or better quality if identical materials or products are not available at the time of service under this warranty. Any replacement of the product under the terms of the Warranty in no way extends the original Warranty period. Any limited credit reimbursement may be prorated based on length of ownership. THESE REMEDIES ARE THE EXCLUSIVE AND SOLE REMEDIES FOR ANY BREACH OF WARRANTY.

What You Must Do
• Retain appropriate and acceptable Proof of Purchase.
• Operate, maintain, and inspect the Product as specified in the Product Documentation (Assembly, Owner’s Manuals, etc.).
• Product must be used exclusively for the purpose intended.
• Notify Nautilus within 30 days after detecting an issue with the Product.
• Install replacement parts or components in accordance with any Nautilus instructions.
• Perform diagnostic procedures with a trained Nautilus, Inc representative if requested.

What Is Not Covered
• Damage due to abuse, tampering or modification of the Product, failure to properly follow assembly instructions, maintenance instructions, or safety warnings as stated in the Product Documentation (Assembly, Owner’s Manuals, etc.), damage due to improper storage or the effect of environmental conditions such as moisture or weather, misuse, mishandling, accident, natural disasters, power surges.
• A machine placed or used in a commercial or institutional setting. This includes gyms, corporations, work places, clubs, fitness centers and any public or private entity that has a machine for use by its members, customers, employees or affiliates.
• Damage caused by exceeding maximum user weights as defined in the Product’s Owner’s manual or warning label.
• Damage due to normal usage and wear and tear.
• This warranty does not extend to any territories or countries outside the United States and Canada.

How to Obtain Service
For Products purchased directly from Nautilus, Inc. contact the Nautilus office listed on the Contacts page of the Product Owner’s manual. You may be required to return the defective component to a specified address for repair or inspection, at your expense. Standard ground shipping of any warranty replacement parts will be paid by Nautilus, Inc. For products purchased from a retailer, you may be asked to contact your retailer for warranty support.

Exclusions
The preceding warranties are the sole and exclusive express warranties made by Nautilus, Inc. They supersede any prior, contrary or additional representations, whether oral or written. No agent, representative, dealer, person or employee has the authority to alter or increase the obligations or limitations of this warranty. Any implied warranties, including the WARRANTY OF MERCHANTABILITY and any WARRANTY OF FITNESS FOR A PARTICULAR PURPOSE, are limited in duration to the term of the applicable express warranty provided above, whichever is longer. Some states do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you.

Limitation of Remedies
EXCEPT AS OTHERWISE REQUIRED BY APPLICABLE LAW, THE PURCHASER’S EXCLUSIVE REMEDY IS LIMITED TO REPAIR OR REPLACEMENT OF ANY COMPONENT DEFECTIVE BY NAUTILUS, INC. TO BE DEFECTIVE UNDER THE TERMS AND CONDITIONS STATED HEREIN. IN NO EVENT WILL NAUTILUS, INC. BE LIABLE FOR ANY SPECIAL, CONSEQUENTIAL, INCIDENTAL, INDIRECT OR ECONOMIC DAMAGES, REGARDLESS OF THE THEORY OF LIABILITY (INCLUDING, WITHOUT LIMITATION, PRODUCT LIABILITY, NEGLIGENCE OR OTHER TORT) OR FOR ANY LOST REVENUE, PROFIT, DATA, PRIVACY OR FOR ANY PUNITIVE DAMAGES ARISING OUT OF OR RELATED TO THE USE OF THE FITNESS MACHINE EVEN IF NAUTILUS, INC. HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THIS EXCLUSION AND LIMITATION SHALL APPLY EVEN IF ANY REMEDY FAILS OF ITS ESSENTIAL PURPOSE. SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF CONSEQUENTIAL OR INCIDENTAL TYPE DAMAGES SO THE ABOVE LIMITATION MAY NOT APPLY TO YOU.

State Laws
This warranty gives you specific legal rights. You may also have other rights, which vary from state to state.

Expirations
If the warranty has expired, Nautilus, Inc. may assist with replacements or repairs to parts and labor, but there will be a charge for these services. Contact a Nautilus office for information on post-warranty parts and services. Nautilus does not guarantee availability of spare parts after expiration of warranty period.

International Purchases
If you purchased your machine outside of the United States consult your local distributor or dealer for warranty coverage.
