Important Safety Instructions

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

Before servicing or using this equipment, obey the following warnings:

- Read and understand the Service Manual before working on the machine. Failure to obey the instructions and safety warnings could cause injury to the service technician or bystanders.

**DANGER** To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and/or the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

- Keep bystanders and children away from the product being serviced at all times.
- Make sure that the repair is done in an appropriate work space away from foot traffic and exposure to bystanders.
- Some components of the equipment can be heavy or awkward. Enlist the service of a second person when you do maintenance steps involving these components. Do not try to do heavy or awkward steps on your own.
- Use only replacement parts and hardware that are supplied or approved by Nautilus. Failure to use Nautilus-approved replacement parts can adversely affect the safety and functionality of the equipment creating a risk to users and will void the warranty.
- Be sure that all warning stickers and instructional placards applied to the product stay present and in good condition when doing maintenance or replacing components. If necessary, request replacement warning stickers or placards from Nautilus customer service.
- Do not try to change the design or functionality of the machine being serviced as this can adversely affect user safety and will void the warranty.
- Do not put the machine back in service until all shrouds, instructions, warning labels and correct functionality have been verified and tested for correct performance.
SAFETY WARNING LABELS AND SERIAL NUMBER

**WARNING**
- Keep children and pets away from this machine at all times.
- When this machine is not in operation, remove the Safety Key and keep out of the reach of children.
- Use Caution when you operate this equipment or serious injury can occur.
- Prior to use, read and understand the Owners Manual, including all Warnings.
- To prevent injury, stand on the Foot Platforms before you start the machine.
- This machine is for Residential use only.
- The Maximum user Weight for this machine is 300lbs. / 136kgs.
- Replace any Warning label that becomes damaged, illegible or is removed.
- Not intended for use by anyone under 14 years of age

**CAUTION ATTENTION**
Unplug power cord before you move the machine.
Débranchez le cordon d’alimentation avant de déplacer la machine.

**WARNING**
HAZARDOUS VOLTAGE.
Contact may cause electrical shock or burn.
Turn off and lock out power before servicing.

**SPECIFICATIONS**

Maximum User Weight: 300 lbs (136 kgs)

Power Requirements:
- Operational Voltage: 120VAC 60 Hz
- Operating Current: 10A max

This product, its packaging, and components contain chemicals known to the State of California to cause cancer, birth defects, or reproductive harm. This Notice is provided in accordance with California’s Proposition 65. If you would like additional information, please refer to our web site at www.nautilus.com/prop65.
Moving Your Machine
The TreadClimber® fitness machine weighs approximately 158 lbs (71.8 kg) when fully assembled and requires caution when being moved. Use the Transport Hand Bar found under the front of the machine to move it. To get access to the Transport Hand Bar, turn the Levelers until you have sufficient clearance between the machine and floor.

Your machine can be rolled on the transport wheels to a new location. Lower your machine slowly into its new location without injury to your head or fingers.

⚠️ Do not use the uprights, handlebars, or the Console to lift or move the machine. Injury to you or damage to the machine can occur.

The machine may be moved by one or more persons depending on their physical abilities and capacities. Make sure that you and others are all physically fit and able to move the machine safely.

Place the machine on a clean, hard, level surface, free from unwanted material or other objects that may hamper your ability to move freely. A rubber mat should be used below the machine to prevent the release of static electricity and protect your flooring.

For safe storage of the machine and to prevent unsupervised operation of the machine always remove the Safety Key and disconnect the power cord from the wall outlet and the AC input. Place the power cord in a secure location.

Leveling Your Machine
Levelers are found on the front of the TreadClimber® machine. Make sure the TreadClimber® machine is level and stable before you exercise. To adjust:

1. Loosen the upper locking nut.
2. Turn the leveler to adjust the height.
3. Tighten the upper locking nut to lock the leveler.

⚠️ Do not adjust the levelers to such a height that they detach or unscrew from the machine. Injury to you or damage to the machine can occur.
MAINTENANCE

Read all maintenance instructions fully before you start any repair work. In some conditions, an assistant is required to do the necessary tasks.

⚠️ Equipment must be regularly examined for damage and repairs. The owner is responsible to make sure that regular maintenance is done. Worn or damaged components must be repaired or replaced immediately. Only manufacturer supplied components can be used to maintain and repair the equipment.

⚠️ DANGER To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and/or the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

Daily: Before each use, inspect for loose, broken, damaged, or worn parts. Do not use the machine if any of these conditions exist. Use a dry cloth to wipe off any perspiration after each use.

Weekly: Check for smooth roller operation. Clean the machine to remove dust, dirt, or grime. Clean the top of the belt with a slightly damp, soapy cloth and wipe carefully and thoroughly with a dry cloth. Do not let any liquid get below the belts or into the Base Frame.

Monthly: Make sure all bolts and screws are tight. Tighten if necessary.

NOTICE: Do not clean with a petroleum based solvent or an automotive cleaner. Be sure to keep the Console free of moisture.

Walking Belt and Deck Lubrication

The TreadClimber® machine is equipped with a low maintenance deck and belt system. Belt friction can affect the function and life of the machine. Your TreadClimber® fitness machine came with a starter supply of lubrication for the belts.

Lubrication Schedule

<table>
<thead>
<tr>
<th>User Level</th>
<th>Total Workout Hours per Week</th>
<th>When to Lubricate</th>
</tr>
</thead>
<tbody>
<tr>
<td>Light</td>
<td>less than 3 hours</td>
<td>every 3 months</td>
</tr>
<tr>
<td>Moderate</td>
<td>3 to 5 hours</td>
<td>every 2 months</td>
</tr>
<tr>
<td>Heavy</td>
<td>5 or more hours</td>
<td>every month</td>
</tr>
</tbody>
</table>

We recommend that you use one of the following:
- Lube-N-Walk® Treadmill Lubrication Kit (available from www.bowflex.com or your local specialty fitness dealer)
- 100% pure silicone, available at most hardware and auto parts stores.

As you use your fitness machine, the Console will show “LUbE” at set times. This is only a reminder and should be added to your inspection schedule. Only apply lubricant as necessary. Push the START button to accept the reminder.

For the best results lubricate the Treadles periodically with a silicone lubricant, using the following instructions:

1. Unplug the machine fully from the wall outlet, and remove the power cord from the machine. Place the power cord in a secure location.

2. Carefully lift each belt and apply silicone lubricant in the center of the Treadle deck along the entire reachable length of the deck. Apply 0.5 to 1.5 oz. of the lubricant on the deck underneath each belt.
**NOTICE:** Always use a 100% pure silicone lubricant. Do not use a degreaser like WD-40® or a petroleum based product as this could seriously impact performance.

**Note:** The Walking Belts may need to be loosened to allow for access during lubrication. Consult the “Adjusting the Walking Belts” procedure if necessary.

3. Connect the power cord back into the machine and then into the wall outlet.

4. Stay to one side of your machine.

5. Switch on your machine and start the belts at the slowest speed. Let the belts operate for approximately 15 seconds.

6. Switch off your machine.

7. Take care to clean up any excess lubricant from the Treadles. We also recommend a periodic inspection of the Treadle surfaces below the belts. If the decks appear worn, contact a TreadClimber Representative (refer to the Contacts section of this manual).

⚠️ **To decrease the possibility of slipping, be sure the Treadle area is free from grease or oil. Clean off any excess oil from the machine surfaces.**
Walking Belt Alignment
The walking belts need to be adjusted if they are out of center enough to cause a rubbing or scraping sound. Adjustments can be made at the Front Roller of each Treadle.

Adjusting the Walking Belts – While operating the machine, notice where the belts run on each Treadle. The Walking Belt Adjustment Bolts are on the front end of each Roller. If the belt is tracking too far to the right, use a properly sized Hex Key to turn the right adjustment bolt clockwise on that belt in full turn increments. If the belt tracks too far to the left, do the same thing on the left adjustment bolt.

Note: Do not turn the bolts counterclockwise when you adjust the belt alignment.

Belt Tension Adjustment – Check the belt tension only when the machine is unplugged. From the belt’s midpoint, a correctly tensioned belt should only have an inch of give. To check, pull the belt upward at its midpoint and measure the distance to the deck. If the distance is more than an inch, the belt is loose. To tighten, turn both Walking Belt Adjustment Bolts clockwise one-half a turn and check tension again. Repeat this step if necessary.

Note: Bolts are turned counterclockwise equally to decrease belt tension.

**ERROR CODES**

- If the error code has never appeared before, the first step should always be to power the machine off/on, and see if the code re-appears. If the code re-appears, or has been seen before, then proceed with the steps below.

- After completion of each resolution step, restart the machine and see if the error returns. If not, proceed to the next resolution step. If issue persists, after all steps followed, contact Customer Service for advanced troubleshooting assistance.

- If multiple codes are present attempt to resolve “Hxx” code before troubleshooting “Cxx” codes. After “Hxx” codes are resolved “Cxx” codes may not re-appear.

Replacing the Console on the TC10 fitness machine

NOTICE: This document provides instructions for the replacement of the Console with electronics on the Bowflex® TC10 fitness machine. If you need assistance, please call Bowflex Customer Service at 1-800-605-3369.

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

Important Safety Instructions - Before servicing or using this equipment, obey the following warnings:

- Read and understand the Part Replacement Procedure before working on the machine. Failure to obey the instructions and safety warnings could cause injury to the service technician or bystanders.
- Keep bystanders and children away from the product being serviced at all times.
- Make sure that the repair is done in an appropriate work space away from foot traffic and exposure to bystanders.
- Disconnect all power and allow to sit for 5 minutes before you service this machine.
- Some components of the equipment can be heavy or awkward. Enlist the service of a second person when you do maintenance steps involving these components. Do not try to do heavy or awkward steps on your own.
- If replacement parts are necessary, use only genuine Nautilus replacement parts and hardware. Failure to use genuine replacement parts can cause a risk to users, keep the machine from operating correctly and will void the warranty.
- Be sure that all warning stickers and instructional placards applied to the product stay present and in good condition when doing maintenance or replacing components. If necessary request replacement warning stickers or placards from Nautilus customer service.
- Do not try to change the design or functionality of the machine being serviced as this can adversely effect user safety.
- Do not use the machine until all shrouds, instructions, warning labels and correct functionality have been verified and tested for correct performance.
- This product contains magnets. Magnetic fields can interfere with the normal use of certain medical devices at a close range. Users may come into proximity of the magnets in the assembly, maintenance, and/or use of the product. Given the obvious importance of these devices, such as a pacemaker, it is important that you consult with your medical provider in connection with the use of this equipment. Please consult the “Safety Warning Labels and Serial Number” section in the Owner’s Manual to determine the location of the magnets on this product.

Tools Required (not included)

- #2 Phillips screwdriver
To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

1. Unplug the power cord from the machine and wait 5 minutes.
2. Disconnect the Upper Input/Output (I/O) Cable.
3. Remove the 14 indicated Phillips head screws securing the Console Top with Electronics to the Console Shroud.
4. Carefully remove the Console Top with Electronics from the front of the Console Shroud.
5. Install the new Console Top with Electronics.
6. Reinstall the 14 Phillips head screws.
7. Connect the Upper I/O Cable.
8. Final Inspection
Inspect your machine to ensure that all hardware is tight and components are properly assembled.

⚠️ Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.
Replacing the Console / Handlebar Assembly on the TC10 fitness machine

NOTICE: This document provides instructions for the replacement of the Console / Handlebar Assembly on the Bowflex® TC10 fitness machine.

If you need assistance, please call Bowflex Customer Service at 1-800-605-3369.

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

Important Safety Instructions - Before servicing or using this equipment, obey the following warnings:

Read and understand the Part Replacement Procedure before working on the machine. Failure to obey the instructions and safety warnings could cause injury to the service technician or bystanders.

Keep bystanders and children away from the product being serviced at all times.

Make sure that the repair is done in an appropriate work space away from foot traffic and exposure to bystanders.

Disconnect all power and allow to sit for 5 minutes before you service this machine.

Some components of the equipment can be heavy or awkward. Enlist the service of a second person when you do maintenance steps involving these components. Do not try to do heavy or awkward steps on your own.

If replacement parts are necessary, use only genuine Nautilus replacement parts and hardware. Failure to use genuine replacement parts can cause a risk to users, keep the machine from operating correctly and will void the warranty.

Be sure that all warning stickers and instructional placards applied to the product stay present and in good condition when doing maintenance or replacing components. If necessary request replacement warning stickers or placards from Nautilus customer service.

Do not try to change the design or functionality of the machine being serviced as this can adversely effect user safety.

Do not use the machine until all shrouds, instructions, warning labels and correct functionality have been verified and tested for correct performance.

This product contains magnets. Magnetic fields can interfere with the normal use of certain medical devices at a close range. Users may come into proximity of the magnets in the assembly, maintenance, and/or use of the product. Given the obvious importance of these devices, such as a pacemaker, it is important that you consult with your medical provider in connection with the use of this equipment. Please consult the “Safety Warning Labels and Serial Number” section in the Owner’s Manual to determine the location of the magnets on this product.

Tools Required (not included)

5mm hex wrench
Note: If only replacing the Console Shroud, use the Console Top with Electronics replacement instructions to transfer the electronics to the new Console Shroud.

1. Disconnect the Upper Input/Output (I/O) Cable.

2. Remove the 6 indicated screws from the Console Assembly using a 5 mm hex wrench.

3. Lift the Console/Handlebar Assembly off of the Uprights and replace with new Console/Handlebar Assembly.

4. Installation is the reverse procedure. Be sure to route the I/O Cable through the same cable path without crimping.

5. Final Inspection
Inspect your machine to ensure that all hardware is tight and components are properly assembled.

⚠️ Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.
Replacing the A/C Inlet on the TC10 fitness machine

NOTICE: This document provides instructions for the replacement of the A/C Inlet on the Bowflex® TC10 fitness machine.

If you need assistance, please call Bowflex Customer Service at 1-800-605-3369.

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

Please consult the “Safety Warning Labels and Serial Number” section in the Owner’s Manual to determine the location of the magnets on this product.

Tools Required (not included)

#2 Phillips Screwdriver
Note: If only replacing the Console Shroud, use the Console Top with Electronics replacement instructions to transfer the electronics to the new Console Shroud.

1. Remove the 6 indicated screws from the Rear Step using a #2 Phillips screwdriver.

2. Remove the Rear Step.

3. With assistance, carefully set the machine on to the left side.

Do not move the machine without aid. Injury to you or damage to the machine can occur. The Treadles and Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the inside of the Treadles and the edges of the Walking Belts.
4. Loosen the two indicated screws and remove the Right Side Cover.

5. On the Motor Control Board, disconnect the A/C Power Wires by releasing the clip and pulling straight up on the Connectors – do not pull on the wire itself.

6. Remove the 2 indicated screws from the A/C Inlet using a #2 Phillips screwdriver.

7. Using a #2 Phillips screwdriver, detach the indicated Grounding Wire from the Base Assembly.

8. Installation is the reverse procedure.

9. Final Inspection
   Inspect your machine to ensure that all hardware is tight and components are properly assembled.

   ! Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner's Manual.
Replacing the Drive Belt on the
TC10 fitness machine

Tools Required (not included)

#2 Phillips screwdriver
To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

1. Unplug the power cord from the machine and wait 5 minutes.

2. Using a #2 Phillips screwdriver, remove the 6 indicated screws from the Rear Step.

3. Remove the Rear Step.

4. The Drive Belt is located on the left and is now exposed.
5. Turn the Drive Pulley clockwise while forcing the Drive Belt to the outside. Belt will come off of the Drive and Motor Pulley.

⚠️ Keep fingers out of any pinch opportunities when turning the Pulleys.

6. Wrap the new Drive Belt around the Motor Pulley. Start the Drive Belt on the Drive Pulley and roll it in a clockwise motion. Be sure the Belt does not come off of the Motor Pulley.

⚠️ Keep fingers out of any pinch opportunities when turning the Pulleys.

7. Roll the Drive Pulley clockwise until the Drive Belt is fully installed. Continue to roll the Belt forward while adding side pressure with fingers to align as necessary.

8. Replace the Rear Step and secure with screws.

9. Final Inspection
Inspect your machine to ensure that all hardware is tight and components are properly assembled.

⚠️ Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.

Tools Required (not included)

- #2 Phillips Screwdriver
- 4mm hex wrench
- 5mm hex wrench
- 10mm wrench
- Replacement Zip-Ties
To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

**Note:** If only replacing the Console Shroud, use the Console Top with Electronics replacement instructions to transfer the electronics to the new Console Shroud.

1. Using a #2 Phillips screwdriver, remove the 6 indicated bolts from the Rear Step.

2. Remove the Rear Step.

3. Remove the Drive Belt. Turn the Drive Pulley clockwise while forcing the Drive Belt to the outside. Belt will come off of the Drive and Motor Pulley.

Keep fingers out of any pinch opportunities when turning the Pulleys.
4. Using a #2 Phillips screwdriver, remove the 2 indicated upper screws and loosen the 2 lower indicated screws from the Rear Cover. Lift up on the Rear Cover, releasing it from the Base Assembly and slide it off.

5. Using two hex wrenches (4 mm and 5 mm), remove the 6 indicated screws from the Motor Compartment Cover.

6. Slide the Motor Compartment Cover off of the machine.
7. On the Motor Control Board, disconnect the Motor Power Wires by releasing the clip and pulling straight out on the Connectors — do not pull on the wire itself.

![Motor Control Board Diagram]

8. Using a #2 Phillips screwdriver, detach the Grounding Wire from the Base Assembly.

9. Using a 10 mm wrench, remove the 4 indicated lock nuts that secure the Motor Assembly.

10. Remove and replace with the new Motor Assembly.

11. Wrap the new Drive Belt around the Motor Pulley. Start the Drive Belt on the Drive Pulley and roll it in a clockwise motion. Be sure the Belt does not come off of the Motor Pulley.

   ! Keep fingers out of any pinch opportunities when turning the Pulleys.

12. Roll the Drive Pulley clockwise until the Drive Belt is fully installed. Continue to roll the Belt forward while adding side pressure with fingers to align as necessary.

13. Installation is the reverse procedure.

14. Final Inspection
   Inspect your machine to ensure that all hardware is tight and components are properly assembled.

   ! Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.
Replacing the Treadle Assembly on the TC10 fitness machine

Skill Level: 1

NOTICE: This document provides instructions for the replacement of the Treadle Assembly on the Bowflex® TC10 fitness machine.

If you need assistance, please call Bowflex Customer Service at 1-800-605-3369.

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

Important Safety Instructions - Before servicing or using this equipment, obey the following warnings:

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

- Read and understand the Part Replacement Procedure before working on the machine. Failure to obey the instructions and safety warnings could cause injury to the service technician or bystanders.
- Keep bystanders and children away from the product being serviced at all times.
- Make sure that the repair is done in an appropriate work space away from foot traffic and exposure to bystanders.
- Disconnect all power and allow to sit for 5 minutes before you service this machine.
- Some components of the equipment can be heavy or awkward. Enlist the service of a second person when you do maintenance steps involving these components. Do not try to do heavy or awkward steps on your own.
- If replacement parts are necessary, use only genuine Nautilus replacement parts and hardware. Failure to use genuine replacement parts can cause a risk to users, keep the machine from operating correctly and will void the warranty.
- Be sure that all warning stickers and instructional placards applied to the product stay present and in good condition when doing maintenance or replacing components. If necessary request replacement warning stickers or placards from Nautilus customer service.
- Do not try to change the design or functionality of the machine being serviced as this can adversely effect user safety.
- Do not use the machine until all shrouds, instructions, warning labels and correct functionality have been verified and tested for correct performance.
- This product contains magnets. Magnetic fields can interfere with the normal use of certain medical devices at a close range. Users may come into proximity of the magnets in the assembly, maintenance, and/or use of the product. Given the obvious importance of these devices, such as a pacemaker, it is important that you consult with your medical provider in connection with the use of this equipment. Please consult the “Safety Warning Labels and Serial Number” section in the Owner’s Manual to determine the location of the magnets on this product.

Tools Required (not included)

#2 Phillips Screwdriver

4mm hex wrench
5mm hex wrench

13mm wrench
To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

1. Using a #2 Phillips screwdriver, remove the 6 indicated bolts from the Rear Step.

2. Remove the Rear Step.

3. Using a #2 Phillips screwdriver, remove the 2 indicated upper screws and loosen the 2 lower indicated screws from the Rear Cover. Lift up on the Rear Cover, releasing it from the Base Assembly and slide it off.
4. Remove the Drive Belt. Turn the Drive Pulley clockwise while forcing the Drive Belt to the outside. Belt will come off of the Drive and Motor Pulley.

Keep fingers out of any pinch opportunities when turning the Pulleys.

5. Using a couple of hex wrenches (4 mm and 5 mm), remove the 6 indicated screws from the Motor Compartment Cover.

6. Remove the lower mounting bolt from the Cylinders. Leave the tops attached.

7. Disconnect the Cylinders from the Treadles, and lower each Treadle gently.

The Treadle will fall abruptly if not supported. Keep hands away from the inside of the Treadles to avoid possible serious injury.
8. With assistance, carefully set the machine on to the left side.

⚠️ Do not move the machine without aid. Injury to you or damage to the machine can occur. The Treadles and Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the inside of the Treadles and the edges of the Walking Belts.

9. Using a #2 Phillips screwdriver, remove the 2 indicated screws from the Front Cover. Remove the Front Cover from the Base Assembly.

10. Using a 13 mm (1/2") wrench, remove the indicated bolt from the Treadle Assembly.

11. With assistance, carefully set the machine upright.

⚠️ Do not move the machine without aid. Injury to you or damage to the machine can occur. The Treadles and Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the inside of the Treadles and the edges of the Walking Belts.

12. Using a 13 mm (1/2") wrench, remove the 3 indicated bolts from both sides of the Treadle Assembly.
13. Carefully lift the Treadle Assembly off of the machine.

**Note:** THIS STEP REQUIRES TWO PEOPLE.

- Do not move the machine without aid. Injury to you or damage to the machine can occur. The Treadles and Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the inside of the Treadles and the edges of the Walking Belts.

- The Treadle will fall abruptly if not supported. Keep hands away from the inside of the Treadles to avoid possible serious injury.

- The Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the edges of the Walking Belts.

14. Reassembly is the reverse procedure.

15. Final Inspection

Inspect your machine to ensure that all hardware is tight and components are properly assembled.

- Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner's Manual.
Replacing the Motor Control Board on the TC10 fitness machine

Skill Level: II

Replacement Procedure

NOTICE: This document provides instructions for the replacement of the Motor Control Board on the Bowflex® TC10 fitness machine. If you need assistance, please call Bowflex Customer Service at 1-800-605-3369.

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

Important Safety Instructions - Before servicing or using this equipment, obey the following warnings:

Tools Required (not included)

- #2 Phillips screwdriver
- 4 mm hex wrench
- 13 mm wrench
To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

1. Unplug the power cord from the machine and wait 5 minutes.

2. Using a #2 Phillips screwdriver, remove the 6 indicated screws from the Rear Step.

3. Remove the Rear Step.

4. Using a #2 Phillips screwdriver, remove the 2 indicated upper screws and loosen the 2 lower indicated screws from the Rear Cover. Lift up on the Rear Cover, releasing it from the Base Assembly and slide it off.
5. Using a 4mm hex wrench and a 13mm wrench, remove the 6 indicated screws from the Motor Compartment Cover.

6. Slide the Motor Compartment Cover off of the machine.

---

**DANGER** To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

7. Record the location of where each wire connects to the Control Board. You will have to reattach each wire to the new Control Board.
8. Disconnect the Motor Power Wires noting their location.

9. Disconnect the Tach Cable noting the location.

10. Disconnect the A/C Power Wire Plug noting the location.

11. Disconnect the I/O Cable from the Motor Control Board.

12. Carefully remove the two indicated Phillips head screws from the Motor Control Board.

13. Remove the Motor Control Board and replace.

14. Secure the new Motor Control Board with the hardware.

15. Connect the Tach Cable and the I/O Cable.

17. Connect the A/C Power Wire Plug to the Motor Control Board.

18. Replace the Motor Compartment Cover, the Rear Cover, and the Rear Step.

19. Replace Power Cord and test machine for proper operation. NO CALIBRATION IS NECESSARY for this model.

20. Final Inspection

Inspect your machine to ensure that all hardware is tight and components are properly assembled.

⚠️ Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.
NOTICE: This document provides instructions for the replacement of the Walking Deck on the Bowflex® TC10 fitness machine. If you need assistance, please call Bowflex Customer Service at 1-800-605-3369.

Please consult the “Safety Warning Labels and Serial Number” section in the Owner’s Manual to determine the location of the magnets on this product.

Tools Required (not included)

#2 Phillips screwdriver

5 mm hex wrench
To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

1. Unplug the power cord from the machine and wait 5 minutes.

2. Using a #2 Phillips screwdriver, remove the 6 indicated screws from the Rear Step.

3. Remove the Rear Step.

4. Using the 5 mm hex wrench, remove the lower mounting bolt from the Cylinder.

5. Disconnect the Cylinder from the Treadle. Leave the top attached.

⚠️ The Treadle will fall abruptly if not supported. Keep hands away from the inside of the Treadles to avoid possible serious injury.

⚠️ The Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the edges of the Walking Belts.
6. Using a #2 Phillips screwdriver, remove the 5 indicated screws from the Side Cover.

7. Slide the Side Cover off of the machine.

8. Using the 5 mm hex wrench, loosen the Belt Tensioning Screws on both Treadles (2 screws on each Treadle).

   **Note:** Be sure to record how many turns it takes to loosen the screws to assist with reassembly.

9. With the Walking Belt loose, shift the belt to the center of the machine and remove the 3 deck screws and 1 belt guide screw using a #2 Phillips screwdriver.
10. Shift the belt to the outside and remove the 4 deck screws using a #2 Phillips screwdriver.

11. Lift the belt slightly and slide the Walking Deck out from under the belt.

12. Slide the new deck in with the laminated side facing up.

13. Repeat procedure on the other side of machine if replacing both Walking Decks.

14. Installation is the reverse procedure.

15. With the Belt Tensioning Screws and Brackets replaced, check the walking belt tension. To check, pull the belt upward at its midpoint and measure the distance to the deck.

If the distance is more than an inch, the belt is loose. To tighten, turn both bolts clockwise one-half a turn and check tension again. Repeat this step if necessary. Be sure not to over-tighten the belts.

16. Inspect the alignment of the Walking Belts. If the belt is tracking too far on a side, turn the Belt Tensioning Screw on that side a full turn.
17. Plug in the fitness machine into an appropriately rated outlet.

**Note:** The TC10 TreadClimber® fitness machine is designed to plug directly into a properly wired and grounded three prong 120V outlet. If you connect the machine to an outlet with GFI (ground fault interrupt) or AFI (arc fault interrupt), machine operation can cause the circuit to trip.

18. Standing adjacent to the machine, turn on the belts and run at 1.5 mph for about a minute.

19. Inspect the alignment. If necessary, continue to adjust the Belt Tensioning Screw until aligned.

20. Final Inspection
Inspect your machine to ensure that all hardware is tight and components are properly assembled.

⚠️ Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.
Replacing the Front Roller on the
TC10 fitness machine

NOTICE: This document provides instructions for the replacement of the Front Roller on the Bowflex® TC10 fitness machine. If you need assistance, please call Bowflex Customer Service at 1-800-605-3369.

Users may come into proximity of the magnets in the assembly, maintenance, and/or use of the product. Given the obvious importance of these devices, such as a pacemaker, it is important that you consult with your medical provider in connection with the use of this equipment. Please consult the “Safety Warning Labels and Serial Number” section in the Owner's Manual to determine the location of the magnets on this product.

Tools Required (not included)

#2 Phillips screwdriver

5mm hex wrench

(2) 13mm (1/2”) wrenches
1. Remove the lower mounting bolt from the Cylinder. Leave attached at top.

2. Disconnect the Cylinder from the Treadle.
   - The Treadle will fall abruptly if not supported. Keep hands away from the inside of the Treadles to avoid possible serious injury.
   - The Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the edges of the Walking Belts.

3. Using a #2 Phillips screwdriver, remove the 5 indicated screws from the Side Cover.

4. Slide the Side Cover off of the machine.

5. Remove the Belt Tensioning Screws and Brackets using a 5 mm hex wrench.
   
   **NOTE:** Be sure to record how many turns it takes to remove the screws to assist with reassembly.

---

**DANGER** To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.
6. Using two 13 mm wrenches, remove the two indicated bolts from the Roller Bearing Plate.

7. Remove the Front Roller by sliding it out of the belt.

8. Installation is the reverse procedure. Be sure to tension belts properly after reassembly following the procedures in the Owner’s manual.

9. With the Belt Tensioning Screws and Brackets replaced, check the walking belt tension. To check, pull the belt upward at its midpoint and measure the distance to the deck.

If the distance is more than an inch, the belt is loose. To tighten, turn both bolts clockwise one-half a turn and check tension again. Repeat this step if necessary. Be sure not to over-tighten the belts.

10. Inspect the alignment of the Walking Belts. If the belt is tracking too far on a side, turn the Belt Tensioning Screw on that side a full turn.

11. Plug in the fitness machine into an appropriately rated outlet.

Note: The TC10 TreadClimber® fitness machine is designed to plug directly into a properly wired and grounded three prong 120V outlet. If you connect the machine to an outlet with GFI (ground fault interrupt) or AFI (arc fault interrupt), machine operation can cause the circuit to trip.

12. Standing adjacent to the machine, turn on the belts and run at 1.5 mph for about a minute.

13. Inspect the alignment. If necessary, continue to adjust the Belt Tensioning Screw until aligned.

14. Final Inspection
Inspect your machine to ensure that all hardware is tight and components are properly assembled.

⚠️ Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.
Replacing the Walking Belt on the
TC10 fitness machine

NOTICE: This document provides instructions for the replacement of the Walking Belt on the Bowflex® TC10 fitness machine.

If you need assistance, please call Bowflex Customer Service at 1-800-605-3369.

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

Important Safety Instructions - Before servicing or using this equipment, obey the following warnings:

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

• Read and understand the Part Replacement Procedure before working on the machine. Failure to obey the instructions and safety warnings could cause injury to the service technician or bystanders.
• Keep bystanders and children away from the product being serviced at all times.
• Make sure that the repair is done in an appropriate work space away from foot traffic and exposure to bystanders.
• Disconnect all power and allow to sit for 5 minutes before you service this machine.
• Some components of the equipment can be heavy or awkward. Enlist the service of a second person when you do maintenance steps involving these components. Do not try to do heavy or awkward steps on your own.
• If replacement parts are necessary, use only genuine Nautilus replacement parts and hardware. Failure to use genuine replacement parts can cause a risk to users, keep the machine from operating correctly and will void the warranty.
• Be sure that all warning stickers and instructional placards applied to the product stay present and in good condition when doing maintenance or replacing components. If necessary request replacement warning stickers or placards from Nautilus customer service.
• Do not try to change the design or functionality of the machine being serviced as this can adversely effect user safety.
• Do not use the machine until all shrouds, instructions, warning labels and correct functionality have been verified and tested for correct performance.
• This product contains magnets. Magnetic fields can interfere with the normal use of certain medical devices at a close range. Users may come into proximity of the magnets in the assembly, maintenance, and/or use of the product. Given the obvious importance of these devices, such as a pacemaker, it is important that you consult with your medical provider in connection with the use of this equipment. Please consult the “Safety Warning Labels and Serial Number” section in the Owner’s Manual to determine the location of the magnets on this product.

Tools Required (not included)

#2 Phillips screwdriver

4 mm hex wrench
5 mm hex wrench

11 mm wrench
(2) 13 mm wrench
To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

1. Unplug the power cord from the machine and wait 5 minutes.

2. Using a #2 Phillips screwdriver, remove the 6 indicated screws from the Rear Step.

3. Remove the Rear Step.

4. Remove the Drive Belt. Turn the Drive Pulley clockwise while forcing the Drive Belt to the outside. The Belt will come off of the Drive and Motor Pulley.

Keep fingers out of any pinch opportunities when turning the Pulleys.
5. Using a #2 Phillips screwdriver, remove the 2 indicated upper screws and loosen the 2 lower indicated screws from the Rear Cover. Lift up on the Rear Cover, releasing it from the Base Assembly and slide it off.

6. Using a 4mm hex wrench and a 13mm wrench, remove the 6 indicated screws from the Motor Compartment Cover.

7. Slide the Motor Compartment Cover off of the machine.

8. While holding a 13 mm (1/2") wrench on the Right Rear Roller Bolt steady, turn another 13 mm (1/2") wrench on the Drive Pulley Bolt counter-clockwise. Remove the Drive Pulley.
9. Using a 5 mm hex wrench, remove the lower mounting bolt from the Cylinder. Leave it attached at the top.

10. Disconnect the Cylinder from the Treadle, and lower the Treadle gently.

- The Treadle will fall abruptly if not supported. Keep hands away from the inside of the Treadles to avoid possible serious injury.

- The Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the edges of the Walking Belts.

11. Using a #2 Phillips screwdriver, remove the 5 indicated screws from the right Side Cover. Slide the Side Cover off of the machine.

12. Remove the Belt Tensioning Screws and Brackets using a 5 mm hex wrench.

**NOTE:** Be sure to record how many turns it takes to remove the screws to assist with reassembly.
13. Using a 11 mm wrench, remove the 4 indicated bolts holding the Treadle Stop to the Right Treadle. There are two bolts on each side of the Treadle.

14. Remove the Treadle Stop.

15. Using two 13 mm wrenches, remove the two bolts from the Roller Bearing Plate.

16. Remove the Front Roller by sliding it out of the belt.

17. With assistance, carefully set the machine on to the left side. Do not move the machine without aid. Injury to you or damage to the machine can occur. The Treadles and Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the inside of the Treadles and the edges of the Walking Belts.

18. Using a #2 Phillips screwdriver, loosen the two indicated screws and remove the Right Rear Cover.

19. Using a 5 mm hex wrench, remove the 2 indicated bolts from the Right Side Bearing Plate.

20. Remove the Right Side Bearing Plate from the Rear Roller.
21. Carefully slide the Walking Belt off of the deck.

22. Installation is the reverse procedure.

23. Follow the same procedure for replacing the left Walking Belt.

24. Once the machine has been reassembled, the Walking Belts will need to be properly tensioned.

   Check the belt tension only when the machine is unplugged.

   To check, pull a Walking Belt upward at its midpoint and measure the distance to the deck. If the distance is more than an inch, the belt is loose. To tighten, turn both of the Belt Tensioning Screws clockwise one-half a turn equally and check the tension again. Repeat this step as necessary on both Belts. Be sure not to over-tighten the belts.

   **NOTE:** Bolts are turned counterclockwise equally to decrease belt tension.

25. With the Walking Belts properly tensioned, the Belts may need to be adjusted to run in the center of each Treadle.

   a. Plug in the power supply.
   b. Stand adjacent to the machine and run the machine at 1.5 MPH. While operating the machine, notice where the belts run on each Treadle.

   **WARNING:** To avoid possible serious injury, do not touch the Walking Belts.

   c. The Belt Tensioning Screws are on the front end of each Roller. If the Belt is tracking too far to the right, use a 5 mm hex wrench to turn the Right Belt Tensioning Screw clockwise on that Belt in a half turn increment.
   d. Allow the Walking Belts to run for approximately 30 seconds noticing if the walking belt is adjusted.
   e. Repeat as necessary until adjusted.

   If the Belt tracks too far to the left, use a 5 mm hex wrench to turn the Left Belt Tensioning Screw clockwise on that Belt in a half turn increment.

26. Final Inspection

   Inspect your machine to ensure that all hardware is tight and components are properly assembled.

   **WARNING:** Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.
Replacing the Virtual Pivot on the TC10 fitness machine

Skill Level: III

NOTICE: This document provides instructions for the replacement of the Virtual Pivot on the Bowflex® TC10 fitness machine.

If you need assistance, please call Bowflex Customer Service at 1-800-605-3369.

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

Important Safety Instructions - Before servicing or using this equipment, obey the following warnings:

- Read and understand the Part Replacement Procedure before working on the machine. Failure to obey the instructions and safety warnings could cause injury to the service technician or bystanders.
- Keep bystanders and children away from the product being serviced at all times.
- Make sure that the repair is done in an appropriate work space away from foot traffic and exposure to bystanders.
- Disconnect all power and allow to sit for 5 minutes before you service this machine.
- Some components of the equipment can be heavy or awkward. Enlist the service of a second person when you do maintenance steps involving these components. Do not try to do heavy or awkward steps on your own.
- If replacement parts are necessary, use only genuine Nautilus replacement parts and hardware. Failure to use genuine replacement parts can cause a risk to users, keep the machine from operating correctly and will void the warranty.
- Be sure that all warning stickers and instructional placards applied to the product stay present and in good condition when doing maintenance or replacing components. If necessary request replacement warning stickers or placards from Nautilus customer service.
- Do not try to change the design or functionality of the machine being serviced as this can adversely effect user safety.
- Do not use the machine until all shrouds, instructions, warning labels and correct functionality have been verified and tested for correct performance.
- This product contains magnets. Magnetic fields can interfere with the normal use of certain medical devices at a close range. Users may come into proximity of the magnets in the assembly, maintenance, and/or use of the product. Given the obvious importance of these devices, such as a pacemaker, it is important that you consult with your medical provider in connection with the use of this equipment. Please consult the “Safety Warning Labels and Serial Number” section in the Owner’s Manual to determine the location of the magnets on this product.

Tools Required (not included)

- #2 Phillips Screwdriver
- 4mm hex wrench
- 5mm hex wrench
- (2) 13mm wrenches
To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

1. Using a #2 Phillips screwdriver, remove the 6 indicated bolts from the Rear Step.

2. Remove the Rear Step.

3. Using a #2 Phillips screwdriver, remove the 2 indicated upper screws and loosen the 2 lower indicated screws from the Rear Cover. Lift up on the Rear Cover, releasing it from the Base Assembly and slide it off.
4. Remove the Drive Belt. Turn the Drive Pulley clockwise while forcing the Drive Belt to the outside. Belt will come off of the Drive and Motor Pulley.

   Keep fingers out of any pinch opportunities when turning the Pulleys.

5. Using a couple of hex wrenches (4 mm and 5 mm), remove the 6 indicated screws from the Motor Compartment Cover.

6. Remove the lower mounting bolt from the Cylinders. Leave the tops attached.

7. Disconnect the Cylinders from the Treadles, and lower each Treadle gently.

   The Treadle will fall abruptly if not supported. Keep hands away from the inside of the Treadles to avoid possible serious injury.
8. With assistance, carefully set the machine on to the left side.

⚠️ Do not move the machine without aid. Injury to you or damage to the machine can occur. The Treadles and Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the inside of the Treadles and the edges of the Walking Belts.

9. Using a #2 Phillips screwdriver, remove the 2 indicated screws from the Front Cover. Remove the Front Cover from the Base Assembly.

10. Using a 13 mm (1/2") wrench, remove the indicated bolt from the Treadle Assembly.

11. With assistance, carefully set the machine upright.

⚠️ Do not move the machine without aid. Injury to you or damage to the machine can occur. The Treadles and Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the inside of the Treadles and the edges of the Walking Belts.

12. Using a 13 mm (1/2") wrench, remove the 3 indicated bolts from both sides of the Treadle Assembly.
13. Carefully lift the Treadle Assembly off of the machine.

**Note:** THIS STEP REQUIRES TWO PEOPLE.

⚠️ Do not move the machine without aid. Injury to you or damage to the machine can occur. The Treadles and Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the inside of the Treadles and the edges of the Walking Belts.

⚠️ The Treadle will fall abruptly if not supported. Keep hands away from the inside of the Treadles to avoid possible serious injury.

⚠️ The Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the edges of the Walking Belts.

14. Remove the 2 indicated bolts from the Virtual Pivot using two 13 mm (1/2") wrenches.

**Note:** When removing the Virtual Pivot, take note of the orientation. It must be replaced in the same orientation.
15. Install the IGUS (“hat” shaped yellow) bushings into the pivot arms.

16. Install the metal spacers/ washers into the yellow bushings.

17. Add the yellow washers to both sides of the Center Block as the bolt is installed. Tighten only until the nut has bottomed out on the metal spacers/ washers.

**Note:** Do not overtighten. Excessive tightening will cause the metal spacer to crack.

18. Remaining assembly is the reverse procedure.

19. Final Inspection
Inspect your machine to ensure that all hardware is tight and components are properly assembled.

⚠️ Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.
Replacing the Hydraulic Cylinder
(shock) on the TC10 fitness machine

Skill Level: I
8006747.101514.A

NOTICE: This document provides instructions for the replacement of the Hydraulic Cylinder (shock) on the Bowflex® TC10 fitness machine.

If you need assistance, please call Bowflex Customer Service at 1-800-605-3369.

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

Important Safety Instructions - Before servicing or using this equipment, obey the following warnings:

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury. Read and understand all Warnings on this machine.

• Read and understand the Part Replacement Procedure before working on the machine. Failure to obey the instructions and safety warnings could cause injury to the service technician or bystanders.
• Keep bystanders and children away from the product being serviced at all times.
• Make sure that the repair is done in an appropriate work space away from foot traffic and exposure to bystanders.
• Disconnect all power and allow to sit for 5 minutes before you service this machine.
• Some components of the equipment can be heavy or awkward. Enlist the service of a second person when you do maintenance steps involving these components. Do not try to do heavy or awkward steps on your own.
• If replacement parts are necessary, use only genuine Nautilus replacement parts and hardware. Failure to use genuine replacement parts can cause a risk to users, keep the machine from operating correctly and void the warranty.
• Be sure that all warning stickers and instructional placards applied to the product stay present and in good condition when doing maintenance or replacing components. If necessary request replacement warning stickers or placards from Nautilus customer service.
• Do not try to change the design or functionality of the machine being serviced as this can adversely effect user safety.
• Do not use the machine until all shrouds, instructions, warning labels and correct functionality have been verified and tested for correct performance.
• This product contains magnets. Magnetic fields can interfere with the normal use of certain medical devices at a close range. Users may come into proximity of the magnets in the assembly, maintenance, and/or use of the product. Given the obvious importance of these devices, such as a pacemaker, it is important that you consult with your medical provider in connection with the use of this equipment. Please consult the “Safety Warning Labels and Serial Number” section in the Owner’s Manual to determine the location of the magnets on this product.

Tools Required (not included)

5mm hex wrench
1. Unplug the power cord from the machine and wait 5 minutes.

2. Remove the lower Cylinder bolt using a 5 mm hex wrench.

2. Disconnect the Cylinder from the Treadle, and lower the Treadle gently.
   - The Treadle will fall abruptly if not supported. Keep hands away from the inside of the Treadles to avoid possible serious injury.
   - The Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the edges of the Walking Belts.

4. Remove the upper Cylinder bolt using a 5 mm hex wrench.

5. Installation is the reverse of this procedure

   Note: The white dot on the top of the Cylinders must point to the inside of the machine. Be sure to attach the cylinder to the Treadle before the Upright.

6. Final Inspection
   Inspect your machine to ensure that all hardware is tight and components are properly assembled.

   Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner's Manual.
Replacing the Lower and Upper Input/Output (I/O) Cable on the Bowflex® TC10 fitness machine

Skill Level: II
8000901.101514.B

To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

1. Unplug the power cord from the machine and wait 5 minutes.

2. Using a #2 Phillips screwdriver, remove the 6 indicated screws from the Rear Step.

3. Remove the Rear Step.

4. Using a #2 Phillips screwdriver, remove the 2 indicated upper screws and loosen the 2 lower indicated screws from the Rear Cover. Lift up on the Rear Cover, releasing it from the Base Assembly and slide it off.
5. Using a 4mm hex wrench and a 13mm wrench, remove the 6 indicated screws from the Motor Compartment Cover.

6. Slide the Motor Compartment Cover off of the machine.

**DANGER** To reduce the risk of electrical shock or unsupervised usage of the equipment, always unplug the power cord from the wall outlet and the machine and wait 5 minutes before cleaning, maintaining or repairing the machine. Place the power cord in a secure location.

7. Record the location of where Input/Output (I/O) Cable connects to the Motor Control Board.
8. Unplug the Lower Input/Output (I/O) Cable from the Motor Control Board.

9. Attach the new Lower I/O Cable to the Motor Control Board.

10. Connect the new Upper I/O Cable to the new Lower I/O Cable.

11. Using some cable or string, attach the ends of the new Upper I/O Cable to the old Lower I/O Cable.

12. Disconnect the old Upper I/O Cable from the Console.

13. Using a 5 mm hex wrench, remove the 6 indicated bolts from the Uprights.

14. Slightly lift the Console/Handlebar Assembly from the Right Upright and hold. THIS STEP REQUIRES TWO PEOPLE.

⚠️ Do not move the machine without aid. Injury to you or damage to the machine can occur. The Treadles and Walking Belts can abruptly move. To avoid possible serious injury, keep hands away from the inside of the Treadles and the edges of the Walking Belts.
15. Remove the old Upper I/O Cable from the Console Assembly noting the path to assist with replacement.

16. Gently pull the old Upper I/O Cable from the Upright. This will pull out the old I/O Cable and place the new I/O Cables. **Note:** Be sure the cable does not crimp when being routed into the Cable Channel near the Motor Control Board.

17. Detach the old Lower I/O Cable from the new Upper I/O Cable.

18. Route the new Upper I/O Cable through the Console Assembly and attach it to the Console. **Note:** DO NOT CRIMP CABLE

19. Attach the Console Assembly to the Uprights. **Note:** DO NOT CRIMP CABLE

20. Replace the Motor Compartment Cover, the Rear Cover, and the Rear Step.

21. Replace Power Cord and test machine for proper operation. NO CALIBRATION IS NECESSARY for this model.

22. Final Inspection
   Inspect your machine to ensure that all hardware is tight and components are properly assembled.

   ![Warning]
   Do not use until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.
