To validate warranty support, keep the original proof of purchase and record the following information:

Serial Number __________________________
Date of Purchase ____________________

To register your product warranty, contact your local distributor.

If you have questions or problems with your product, please contact your local Schwinn distributor. To find your local distributor, go to: www.nautilusinternational.com or www.nautilus.cn
IMPORTANT SAFETY INSTRUCTIONS

This icon means a potentially hazardous situation which, if not avoided, could result in death or serious injury.

Obey the following warnings:

Read and understand all warnings on this machine.

Carefully read and understand the Assembly instructions.

• Keep bystanders and children away from the product you are assembling at all times.
• Do not install the batteries into the machine until the time specified in the assembly manual.
• Do not assemble this machine outdoors or in a wet or moist location.
• Make sure assembly is done in an appropriate work space away from foot traffic and exposure to bystanders.
• Some components of the machine can be heavy or awkward. Use a second person when doing the assembly steps involving these parts. Do not do steps that involve heavy lifting or awkward movements on your own.
• Set up this machine on a solid, level, horizontal surface.
• Do not try to change the design or functionality of this machine. This could compromise the safety of this machine and will void the warranty.
• If replacement parts are necessary use only genuine replacement parts and hardware supplied by Nautilus. Failure to use genuine replacement parts can cause a risk to users, keep the machine from operating correctly and void the warranty.
• Do not use or put the machine into service until the machine has been fully assembled and inspected for correct performance in accordance with the Manual.
• Read and understand the complete Manual supplied with this machine before first use. Keep the Manual for future reference.
• Do all assembly steps in the sequence given. Incorrect assembly can lead to injury or incorrect function.

Before using this equipment, obey the following warnings:

Read and understand all warnings on this machine. If at any time the Warning stickers become loose, unreadable or dislodged, contact your local Schwinn distributor for replacement stickers.

• Children must not be let on or near to this machine. Moving parts and other features of the machine can be dangerous to children.
• Not intended for use by anyone under 14 years of age.
• Consult a physician before you start an exercise program. Stop exercising if you feel pain or tightness in your chest, become short of breath, or feel faint. Contact your doctor before you use the machine again. Use the values calculated or measured by the machine’s computer for reference purposes only.
• Before each use, examine this machine for loose parts or signs of wear. Do not use if found in this condition. Monitor the Pedals and Crank Arms closely. Contact your local Schwinn distributor for repair information.
• Maximum user weight limit: 136 kg (300 lbs.). Do not use if you are over this weight.
• This machine is for Home use only. Do not use in a commercial setting.
• Do not wear loose clothing or jewelry. This machine contains moving parts. Do not put fingers or other objects into moving parts of the exercise equipment.
• Set up and operate this machine on a solid, level, horizontal surface.
• Do not step off the machine until the Pedals have fully stopped.
• Make the Pedals stable before you step on them. Use caution when you step on and off the machine.
• Do not operate this machine outdoors or in moist or wet locations.
• Keep at least 0.6 m (24”) on each side of the machine clear. This is the recommended safe distance for access and passage around and emergency dismounts from the machine. Keep third parties out of this space when machine is in use.
SAFETY WARNING LABELS AND SERIAL NUMBER

- Do not over exert yourself during exercise. Operate the machine in the manner described in this manual.
- Perform all regular and periodic maintenance procedures recommended in the Owner’s Manual.
- Correctly adjust and safely engage all Positional Adjustment Devices. Make sure that the Adjustment Devices do not hit the user.
- Keep the Pedals clean and dry.
- Exercise on this machine requires coordination and balance. Be sure to anticipate that changes in speed and resistance level can occur during workouts, and be attentive in order to avoid loss of balance and possible injury.
- Keep batteries away from heat source and hot surfaces.
- Do not drop or put objects into any opening of the machine.
- Do not mix old and new batteries.
- Do not mix alkaline, standard (carbon-zinc), or rechargeable (Ni-Cd, Ni-MH, etc) batteries.
- Do not try to charge non-rechargeable batteries. Remove exhausted batteries and dispose of them safely.
- Remove rechargeable batteries from the machine before recharging them.
- Do not short-circuit the supply terminals on the batteries.
- For safe storage of the machine, remove the batteries and install the Transport and Immobilization Strap to secure the Resistance Fan. Place the machine in a secure location away from children and pets.
- This bike cannot stop the Pedals independently of the Resistance Fan. Reduce the pace to slow the Resistance Fan and Pedals to a stop. Do not dismount the bike until the Pedals have come to a complete stop. Be aware that the moving Pedals can strike the backs of the legs.
- This appliance is not intended for use by persons with reduced physical, sensory or mental capabilities, or lack of knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Keep children under the age of 14 away from this machine.
- Children should be supervised to ensure that they do not play with the appliance.

Safety Warning Labels and Serial Number

Serial number
Product specification
Before Assembly

Select the area where you are going to set up and operate your machine. For safe operation, the location must be on a hard, level surface. Allow a workout area of a minimum 187.2 cm (73.7”) x 248.2 cm (97.7”).

Basic Assembly Tips

Follow these basic points when you assemble your machine:

- Read and understand the “Important Safety Instructions” before assembly.
- Collect all the pieces necessary for each assembly step.
- Using the recommended wrenches, turn the bolts and nuts to the right (clockwise) to tighten, and the left (counterclockwise) to loosen, unless instructed otherwise.
- When attaching 2 pieces, lightly lift and look through the bolt holes to help insert the bolt through the holes.
- The assembly requires 2 people.
A decal has been applied to all right ("R") and left ("L") parts to assist with assembly.

### Tools

**Included**

- **A** 4 Button Head Hex Screw, M8x1.25x20
- **B** 4 Washer, M8 Lock
- **C** 4 Washer, M8
- **D** 4 Washer, M8 Black
- **E** 4 Button Head Hex Screw, M8x1.25x12 Black

- **Tools**
  - 6 mm
  - #2
  - 13 mm
  - 15 mm
  - 17 mm

- 2 AA size batteries (LR6)
1. Attach Stabilizers to Frame

Note: Hardware is pre-installed and not on the Hardware Card (*).

2. Attach Pedals and then Pedal Straps to Frame Assembly

Note: The Left Pedal is reverse-threaded. Be sure to attach Pedals on the proper side of the Bike. Orientation is based from a seated position on the bike. The Left Pedal has an “L”, the Right Pedal an “R”. 
3. Connect Cables and Attach the Console Support Bar to Frame Assembly

*Note:* Do not crimp the cables. Pull the lower cable to remove any slack as you insert the Console Support Bar.

⚠️ In order to avoid possible serious injury, when inserting the tube ends into the Frame Assembly be careful to avoid fingers or hands being caught or pinched.

4. Remove Hardware and Install Batteries into Console

*Note:* Make sure that the batteries point in the direction of the +/- indicators in the battery bay. Hardware is pre-installed and not on the Hardware Card (*).

⚠️ Do not mix alkaline, standard (carbon-zinc), or rechargeable (Ni-Cd, Ni-MH, etc) batteries.
5. Connect Cable and Attach the Console
Note: Do not crimp Console Cable.

6. Attach Water Bottle Holder to Frame Assembly
Note: Hardware is pre-installed and not on the Hardware Card ( * ).
7. Attach Endcaps, Handlebar Arms and Foot Pegs to Frame Assembly

**Note:** Remove protective plastic caps from pivots.
Put Endcaps in position on pivots.
Then install Handlebar Arms and Foot Pegs.

8. Loosen and Pull the Seat Post Adjustment Knob to Attach Seat Post to Frame Assembly
9. Attach Seat to Seat Post

*NOTICE:* Be sure the Seat is straight and then tighten the hardware.

10. Final Inspection

Inspect your machine to ensure that all hardware is tight and components are properly assembled.

⚠️ Do not use or put the machine into service until the machine has been fully assembled and inspected for correct performance in accordance with the Owner’s Manual.
Moving the Machine

The machine may be moved by one or more persons depending on their physical abilities and capacities. Make sure that you and others are all physically fit and able to move the machine safely. Use proper safety precautions and lifting techniques.

1. Secure the Handlebar to the Console Support Bar with the Transport and Immobilization Strap (T).
2. Use the Rear Stabilizer to carefully lift the machine onto the transport rollers.
   
   **Note:** Be sure to keep the fan assembly clear of the floor.

3. Push the machine into position.
4. Carefully lower the machine into position.

**NOTICE:** Be careful when you move the machine. All abrupt motions can affect the computer operation.

Leveling the Machine

The machine needs to be leveled if your workout area is uneven. To adjust:

1. Place the machine in your workout area.
2. Loosen the locking nuts and adjust the levelers until they are evenly balanced and in contact with the floor.

   **Do not adjust the levelers to such a height that they detach or unscrew from the machine. Injury to you or damage to the machine can occur.**

3. Tighten the locking nuts.

Make sure the machine is level and stable before you exercise.

To order, contact your local Schwinn distributor.

WARNING! Use the values calculated or measured by the machine’s computer for reference purposes only. The heart rate displayed is an approximation and should be used for reference only. Over exercising may result in serious injury or death. If you feel faint stop exercising immediately.
Console Features
The Console provides information about your workout on the display screen.

**LCD Display Data**
The console display shows each workout value.

**RPM**
The RPM display field shows the machine revolutions per minute (RPM). The maximum display is 100.

**Time**
The TIME display field shows the time count of the workout. The maximum display is 99:59. If the time count is more, the display starts again at 0:00.

During the initial power-up, this display will show altitude ("Alt"). The altitude where the machine will be in operation must be entered.

**Speed**
The SPEED display field shows the machine speed in kilometers per hour ("KM") or miles per hour ("M"), to one decimal place—for example, 3.4 or 10.5. The maximum display is 99.9.

**Dist.**
The DISTANCE display field shows the distance count (miles or km) in the workout, to two decimal places—for example, 2.07. The maximum display is 99.99. If the distance exceeds 99.99, the display starts again at 0.00.

**Watts**
The WATTS display field shows the power that you are producing at the current resistance level (1 horsepower = 746 watts).

**Calories**
The CALORIES display field shows the estimated calories that you have burned during the exercise. The maximum display is 9999. If the calorie count is more, the display flashes 9999.

**Pulse**
The PULSE display shows the heart rate in beats per minute (BPM) from a telemetric heart rate sensor. The icon will flash when it has a signal from a telemetric heart rate strap. This display value will be blank if a heart rate signal is not detected.

Consult a physician before you start an exercise program. Stop exercising if you feel pain or tightness in your chest, become short of breath, or feel faint. Contact your doctor before you use the machine again. Use the values calculated or measured by the machine’s computer for reference purposes only.

**Keypad Functions**
Decrease (▼) button- Decreases a value (time or altitude) or moves through options
START/STOP button- Starts a Program workout, confirms a selection, and ends a paused workout if held down for 3 seconds.

Increase (▲) button- Increases a value (time or altitude) or moves through options

Remote Heart Rate Monitor
Monitoring your Heart Rate is one of the best procedures to control the intensity of your exercise. The Console can read telemetry HR signals from a Heart Rate Chest Strap Transmitter that operates in the 4.5kHz - 5.5kHz range.

Note: The heart rate chest strap must be an uncoded heart rate strap from Polar Electro or an uncoded POLAR™ compatible model. (Coded POLAR™ heart rate straps such as POLAR™ OwnCode™ chest straps will not work with this equipment.)

If you have a pacemaker or other implanted electronic device, consult your doctor before using a wireless chest strap or other telemetric heart rate monitor.

Heart Rate Calculations
Your maximum heart rate usually decreases from 220 Beats Per Minute (BPM) in childhood to approximately 160 BPM by age 60. This fall in heart rate is usually linear, decreasing by approximately one BPM for each year. There is no indication that training influences the decrease in maximum heart rate. Individuals of the same age could have different maximum heart rates. It is more accurate to find this value by completing a stress test than by using an age related formula.

Your at-rest heart rate is influenced by endurance training. The typical adult has an at-rest heart rate of approximately 72 BPM, where as highly trained runners may have readings of 40 BPM or lower.

The Heart Rate table is an estimate of what Heart Rate Zone (HRZ) is effective to burn fat and improve your cardiovascular system. Physical conditions vary, therefore your individual HRZ could be several beats higher or lower than what is shown.

The most efficient procedure to burn fat during exercise is to start at a slow pace and gradually increase your intensity until your heart rate reaches between 60 – 85% of your maximum heart rate. Continue at that pace, keeping your heart rate in that target zone for over 20 minutes. The longer you maintain your target heart rate, the more fat your body will burn.

The graph is a brief guideline, describing the generally suggested target heart rates based on age. As noted above, your optimal target rate may be higher or lower. Consult your physician for your individual target heart rate zone.

Note: As with all exercises and fitness regimens, always use your best judgment when you increase your exercise time or intensity.
What to Wear
Wear rubber-soled athletic shoes. You will need the appropriate clothes for exercise that allow you to move freely.

How Often Should You Exercise
Consult a physician before you start an exercise program. Stop exercising if you feel pain or tightness in your chest, become short of breath, or feel faint. Contact your doctor before you use the machine again. Use the values calculated or measured by the machine’s computer for reference purposes only. The heart rate displayed is an approximation and should be used for reference purposes only.

• 3 times a week for 20 minutes each day.
• Schedule workouts in advance and try to follow the schedule.

Seat Adjustment
Correct seat placement encourages exercise efficiency and comfort, while reducing the risk of injury.
1. With a Pedal in the forward position, place the heel of your foot to the lowest part of it. Your leg should be bent slightly at the knee.
2. If your leg is too straight or your foot cannot touch the Pedal, you need to move the seat downward. If your leg is bent too much, you need to move the seat upward.

Step off the machine before you adjust the seat.
3. Loosen and pull the Seat Post Adjustment Knob on the Seat Post. Adjust the seat to the desired height.

Do not lift the Seat post above the “STOP” mark on the Seat Post.
4. Release the Seat Post Adjustment Knob to engage the locking pin. Be sure that the pin is fully engaged and fully tighten the adjustment knob.

Foot Position / Pedal Strap Adjustment
Foot pedals with straps provide secure footing to the exercise bike.
1. Rotate the Pedals until one can be reached.

Be aware that the Pedals, Handlebars and Resistance Fan are connected and when any of these parts move the others do as well.
2. Put the ball of each foot on the Pedals.
3. Fasten the strap over the shoe.
4. Repeat for the other foot.

Be sure toes and knees point directly forward to ensure maximum Pedal efficiency. Pedal straps can be left in position for subsequent workouts.

Using the Machine
Be aware that the Pedals, Handlebars and Resistance Fan are connected and when any of these parts move the others do as well.

Carefully mount the machine using the Foot Step Pad if necessary. Adjust the Seat and Pedals before starting a workout. Lower Body Workout: Slowly pedal with your arms relaxed at your sides or with your hands resting on the Hand Grips as the Handlebars move.
Full Body Workout: Grasp the Hand Grips with your palms down. Push and pull the Handlebars as you pedal, keeping your elbows low and next to your body.

Upper Body Workout: Grasp the Hand Grips firmly with palms down and place your feet on the Foot Pegs. Lean slightly forward at the hips with your back straight and shoulders down. Now push and pull the Handlebars.

**Note:** You may need to safely push a Pedal to assist with starting the workout.

To increase the air resistance and workload, increase your level of activity. To exercise all the muscle groups in your arms, alter your grasp to palms up for part of the workout.

When done with your workout, reduce the Resistance Fan speed until the machine fully stops.

**Warning:** This bike cannot stop the Pedals independently of the Resistance Fan. Reduce the pace to slow the Resistance Fan and Pedals to a stop. Do not dismount the bike until the Pedals have come to a complete stop.

### Locking the Fan Assembly / Storage

When the machine is not in use, be sure to lock the Fan Assembly with the Transport and Immobilization Strap. The fan assembly should be locked for storage of the machine.

**Warning:** For safe storage of the machine, remove the batteries and install the Transport and Immobilization Strap to secure the Resistance Fan. Place the machine in a secure location away from children and pets. Be aware that the Pedals, Handlebars and Resistance Fan are connected and when any of these parts move the others do as well.

To lock the Fan Assembly:

1. Move the Handlebars so that one Handlebar is as close as possible to the Console Support Bar.
2. Wrap the Transport and Immobilization Strap (T) around the Handlebar and the Console Support Bar and put the end of the strap through the metal ring. Tighten the strap to prevent movement of the handlebars and secure the strap.

### Power-Up / Idle Mode

The Console will enter Power-Up / Idle Mode if any button is pushed, or if it receives a signal from the RPM sensor as a result of pedaling the machine.

**Note:** The Console will display "Lbatt" if the batteries are around 10% of their rated power during power up.

### Auto Shut-Off (Sleep Mode)

If the Console does not receive any input in approximately 5 minutes, it will automatically shut off. The LCD display is off while in Sleep Mode.

**Note:** The Console does not have an On/Off switch.
Initial Setup
During the initial power-up, the Console will display “Alt” and must be setup with the current workout altitude.
1. Push the Increase/Decrease buttons to change the value for the altitude. Entering the correct value will make the calorie count more accurate.
2. Push the START/STOP button to set.
   Note: The altitude value can be adjusted at a future time. To adjust the value, consult the “Console Set-Up Mode” section.

Quick Start Workout
The Quick Start program lets you start a workout without entering any information.
1. Sit on the machine.
2. With the Console in Idle Mode, push the START/STOP button to start the workout program.
3. When done with your workout, stop pedaling. Then push and hold down the START/STOP button for 3 seconds to end the workout.

Custom Time Workout
The Console allows you to select a Custom Time Workout and enter your own time value. The Console will remember this value until changed.
1. Sit on the machine.
2. With the Console in Idle Mode, push and hold down for 3 seconds the START/STOP button.
3. The Console will show the default value or the last custom time value.
   Note: The default time value is 20 minutes.
4. Push the Increase and Decrease buttons to adjust the custom time value.
5. Push START/STOP to accept the custom time workout. Your Custom Goal Workout will now begin.

Pausing or Stopping
To Pause a workout:
1. Stop pedaling to pause your workout.
   Note: The Console will automatically pause if there is no RPM signal for 5 seconds.
2. To continue your workout, push START/STOP or start pedaling.
   To stop the workout, push and hold down the START/STOP button for 3 seconds. The Console will go into Results mode.

When paused, the Console display will flash the current workout values of TIME, AVERAGE SPEED, DISTANCE, TOTAL MACHINE DISTANCE (“Odo.”), WATTS, CALORIES, and AVERAGE HEART RATE (if activated).

Results Mode
When you complete or end a workout, the Console will display your workout values three times in the order of TIME, AVERAGE SPEED, DISTANCE, WATTS, CALORIES, and AVERAGE HEART RATE (if activated).

Push START/STOP to stop the Results display and go back to Idle Mode.
The Console Service Mode lets you set the units of measurement to either English or Metric, see the total time and distance the machine has been used, adjust the altitude value for a more accurate calorie count, or find out which version of Firmware is installed.

1. Hold down the Increase button and Decrease button together for 3 seconds while in the Idle Mode to go into the Console Service Mode.

2. The Console display shows the Units prompt ("Unit"). Push START/STOP to start Units option. Push the Increase/Decrease buttons to change between "M" (Imperial English units) and "KM" (metric units).

3. Push START/STOP to set. For the next option, push the Increase button.

4. The Console display shows the Workout Statistics prompt ("StAt"). Push START/STOP to start the Workout Statistics option. The Console will display the Total Distance ("Odo") and Total Time.

   **Note:** The upper displayed value is total hours followed by the remaining minutes.

5. Push START/STOP to exit. For the next option, push the Increase button.

6. The Console display shows the Firmware Version prompt ("Fir"). The Console will display which Firmware Version is installed in the Speed display field.

7. For the next option, push the Increase button.

8. The Console display shows Altitude ("Alt") with the previously entered value in the Speed display field. Push START/STOP to adjust the Altitude value. Use the Increase/Decrease buttons to change the value.

9. Push START/STOP to exit. For the next option, push the Increase button.

10. The Console display shows the exit prompt ("dOnE").

11. Push START/STOP to exit.

To fully exit the Console Service Mode push and hold down the START/STOP button for 3 seconds. In Service Mode if the Console does not receive any input in approximately 5 minutes, it goes into Sleep Mode.
Read all maintenance instructions fully before you start any repair work. In some conditions, an assistant is required to do the necessary tasks.

**Equipment must be regularly examined for damage and repairs. The owner is responsible to make sure that regular maintenance is done. Worn or damaged components must be repaired or replaced immediately. Only manufacturer supplied components can be used to maintain and repair the equipment.**

If at any time the Warning labels become loose, unreadable or dislodged, contact your local distributor for replacement labels.

Disconnect all power to the machine before you service it.

---

**Daily:**
Before each use, examine the exercise machine for loose, broken, damaged, or worn parts. Do not use if found in this condition. Repair or replace all parts at the first sign of wear or damage. After each workout, use a damp cloth to wipe your machine and Console free of moisture.

**Note:** Avoid excessive moisture on the Console.

**NOTICE:** If necessary, only use a mild dish soap with a soft cloth to clean the Console. Do not clean with a petroleum based solvent, automotive cleaner, or any product that contains ammonia. Do not clean the Console in direct sunlight or at high temperatures. Be sure to keep the Console free of moisture.

---

**Weekly:**
Clean the machine to remove any dust, dirt, or grime from the surfaces. Check for smooth seat operation. If needed, sparingly apply a thin coating of silicone lube to ease operation.

**Silicone lubricant is not intended for human consumption. Keep out of reach of children. Store in a safe place.**

**Note:** Do not use petroleum based products.

---

**Monthly or after 20 hours:**
Check pedals, crank arms and handlebars. Make sure all bolts and screws are tight. Tighten as necessary.
Replacing the Console Batteries

The Console will display “Lbatt” for ten seconds when the batteries are around 10% of their rated power during power up. When replacing the batteries, make sure the batteries point in the +/- direction shown in the battery bay.

Note: The console uses AA size batteries (LR6).

⚠️ Do not mix old and new batteries.
Do not mix alkaline, standard (carbon-zinc), or rechargeable (Ni-Cd, Ni-MH, etc) batteries.
